Project Update – Road reinstatement – Randall Street, Petrie Street, Stapletons Road

The Council's Dudley Creek Bypass flood mitigation works are now completed, and work to permanently reinstate the road in Randall Street (North Parade to Petrie Street), Petrie Street (North of Dudley Creek Bypass to Randall Street), and Stapletons Road (in area of Stapletons Road Culvert) can now start.

There has been a delay to starting the reinstatement works. It was planned to start these immediately after the land drainage works were completed, but the works will not now start until 2018.

We apologise for these delays and know you have had lengthy periods of time with works on your street.

The plans for the road reinstatement works along Randall Street and Petrie Street can be viewed at: www.ccc.govt.nz/dudleycreek

A temporary chip seal has been laid to ensure access to these streets over the Christmas / New Year period.

If you have any queries or concerns regarding the works, please contact the Council on 03 941 8999, or visit www.ccc.govt.nz/dudleycreek for more information.

Yours faithfully

Kirsty Mahoney
Project Manager, Transport
