

# Christchurch City Council

## Electing the Mayor

---

### Lianne DALZIEL

One City Together

*My principal place of residence is in the Christchurch City Council area.*

It's hard to believe it's three years since that 4.35am wake-up call and now we're building the newest city in the world. Christchurch businesses and communities have done amazing things against the odds, but at the same time there are many people still living in damaged homes, not knowing what the future holds.

I'm standing for Mayor because I want to unite the city, bringing certainty to households, investors and central government alike. We've got three years to get things back on track before CERA disappears. I want to rebuild public trust and confidence in the council by ensuring transparency, accountability and financial responsibility.

My experience as a government minister, my commitment to empowering communities and my passion for the city where I was born and have always lived mean that with your vote, we can make Christchurch the smartest, most sustainable, most liveable city in the world.
