14865	Stephen Shannahan	Local resident	support the plan	Are you intending to install security lighting to prevent vandalism to the building and provide a safe environment for those using the facility.	We are installing external lights in the front and back, and will operate off the streetlight circuit.
14830	Janeth Flores Albano Greenaway		support the plan	A good idea to have a toilet in the park and I suggest that it is closed after 5pm every night during winter and 7pm during summer and daylight savings. The reason I suggested for the toilet closure during the night is due to the avoidance of vandalism and so no one uses it during the night for security reason. Daily it is opened and every night it is closed. How often is the toilet cleaned? It should be cleaned before it is being closed every night or in the morning before it is being opened to the public. If there is no current rubbish bin, I suggest that rubbish bin is installed, it has to be something that only small and not household rubbish chucked in. The community has to take pride of the park so it has to be monitored regularly otherwise it will be subjected to vandalism and abused.	The toilet will be locked overnight. This will be arranged with our security and maintenance teams. The toilet will be cleaned weekly and more regularly if there is more use. Our maintenance team will be organising the cleaning, and checking on the toilet. Yes we will consider this, however it may be located near the playground instead, this is to be confirmed.
14774	Larry Pateman		support the plan	Great news for the community well done	
14773	Jeanette Pateman		support the plan	Good news about the toilets	
14772	Fiona White		support the plan	Are the plants being used drought resistant or will they need watered ever so often? So we don't waste water on plants. Does the toilet have handles inside so someone in a wheelchair has handles to help get off and on the toilet and room for a wheelchair too? Who puts the toilet paper in the dispenser and how if you run out do you get more (and how often do you check this)? How is it clean of paper on the floor? How are you to dry your hands?	The plants will be grasses, so they require very little maintenance. There will handles to help get on and off the toilet as well as room and access for a wheelchair. The toilet will be cleaned weekly and more regularly if there is more use. Our maintenance team will be organising the cleaning, and checking on the toilet paper. There will be either a dryer or paper towels to dry your hands.
14594	Viki Falcon		support the plan	I'm happy that the community sports teams can use the facilities. I like the idea of using solar lights. I hope that our community can respect building by not damaging our communities property	
14308	Loretta & Nick Te Paa		support the plan	We at the Riccarton West Community Garden do not have toilet facilities and we applaud the plan of the proposed new toilet in Harrington Park and its location. We also welcome the wall space for a Native Board Artwork and storage space for a volleyball net	
14234	Carolyn Elcock		support the plan	This has been needed since our children now in their 40's were toddlers. Lived in the area since 1972 and have often wondered why there wasn't a toilet here. Being placed in park close to road will be the best position as years ago there was a problem with pipes placed for children to play in and turned out older children and adults used it for drug use.	
14225	Anthony Rimell	Riccarton Baptist Church	support the plan	Harrington park is a focal point for many in our community. Since the successful impact of the Community Policing Team, many families and community groups have come to use the park on a regular basis. For example, over the last Summer we took our church community to the park a number of times to enjoy the facilities and connect with our local community. The most constraining aspect of the park is the lack of toileting. The installation of a toilet in the park will be a practical benefit to the community and the users of the park facilities. As a local community group, we are committed to playing our part to make the area as user-friendly as possible. We are happy to be involved in any way that will make installing this toilet a top priority for the CCC.

14098	Angel Salazar		support the plan	Hoping that the toilet will be properly maintain. Some light around the park maybe nice.	The toilet will be cleaned weekly and more regularly if there is more use. Our maintenance team will be organising the cleaning, and checking on the toilet. We are installing external lights in the front and back, and will operate off the streetlight circuit.
14073	Holly Hobbs		support the plan	I think it's a great idea and much needed asset - as long as it's maintained regularly.	The toilet will be cleaned weekly and more regularly if there is more use. Our maintenance team will be organising the cleaning, and checking on the toilet.
13956	Annie Jefferies		support the plan	Our family of five loves this park and uses it regularly. It's about 10 minutes walk from our home and the lack of a toilet has been a real pity. It's a good park that suits kids and teens as you can spend lots of time on the flying fox as well as playing basketball. Many a trip has been cut short due to someone needing the toilet, with toilets we will be able to stay longer and picnic too. A quick spot check revealed more than half our family has weeded in a bush at some point over the last five years! Sorry
