20509	,							recommend investigating	
							We would like to also recommend that the hard landscaping of paths and water features currently shown as Stage 4 and 5 be brought forward into Stage 2 as	potential efficiencies and	U
							then community and school planting programs like ours could start replanting the area. This would mean that over time the area could become that which the	the landscaping cost	Boys' High
							council has designed but at minimal cost. If the hard landscaping is not done planting would be compromised by the subsequent earthworks required. The	upfront that would be	School
							large bank bund shown around the multi-use area could be built from soils excavated on site that would then become the lake shown. Please consider forming	needed to achieve later	
							the earthworks in Stage 4 and 5 associated with the stream and ponds as well as other rough levelling and surveying of paths as part of Stage 1. This will allow planting of the native tree areas and wetlands to start immediately so that later when funds are allocated to put the finishing touches to the nature trail and	savings.	
							bush areas there are already sizable trees established. I have established two small school nurseries at SBHS and Christ's College and have a model that I will		
							start to promote to other schools to allow them to also grow on eco sourced native trees. I have been doing this for two seasons and support Travis Wetland		
							Trust as well as Avon Otakaro Forest Park and have spoken to Ranger John Skilton and CC Parks Visitor Experience Sarah Mankelow about this proposal. I have		
							a seed collecting permit for specific parts of Travis Wetland and would grow plants for the other schools to grow on. They would then donate the plants back to		
							be planted at restoration sites, this being one of them. The students at the schools would be encouraged to help plant as would their parents and the wider		
							community as happens currently on Travis Wetland planting days that attract up to 300 planters. If the waterways connecting the existing ponds were graded in and the pathways proposed in the masterplan as Stage 4 and 5 were dozed and shingled		
							planting could commence in the winter of 2019 rather than wait till funds were allocated and available. Then the trees would be 5 years established and already	,	
							supporting wildlife diversity when the finishing touches to the nature walk and wetland could be put in. The storage yard and heavy machinery that currently is		
							on the driving range site could be used to do this relatively minor earthworks at minimal extra expense. The proposed paths would also give a useful place to		
							redistribute the shingle hardfill that currently contaminates the site and would have to be removed before trees would be able to establish any way. Please do		
							not underestimate the goodwill and community involvement benefit that will flow from allowing us to help the council complete this concept plan.		
							With heavy machinery on site and a requirement to rehabilitate the shingle pit area as well as the need to treat runoff stormwater and obtain fill for the bund it shouldn't require anything to be "pushed out". The rough site works could be done at minimal expense using the machinery and materials already on site.

							QEII Park Submission. Mainland Football and Coastal Spirit FC.		
							Mainland football would like to take an opportunity to submit on the Draft QEII Park Master plan in conjunction with Coastal Spirit AFC. Background		
							As an RSO Mainland Football id responsible for the delivery of football through a club network for a region that reaches from Ashburton through to Nelson.		
							We have over 15 000 active members across the region with 11 000 residing in the Canterbury Area.		
							Coastal Spirit FC is one of the premier Clubs in town and was established after the merging of New Brighton AFC and Rangers AFC. The club provides football to		
							a membership base of approx. 600 members.		

							The various home grounds of the clubs have been severely affected by the earthquakes with their grounds used at Bexley being destroyed a
							where several football fields use to be. Looking forward Mainland Football has engaged with council with regards to the long-term sports field network plan being led by Kelly Hansen. From here Mainland Football has worked with Council and Sport Canterbury to prepare a Field network plan for football that will provide a r vision for the next 10+ years. This plan will include a network of Artificial Sports Fields to ensure a quality program can be delivered from our right though to senior Club Football. The plan is that this will support the grass field network in place. It is planned to have this report compl We would like to explore in more detail with Council how Coastal Spirit as a club would be able to get involved with the Development of the Sports field as part of the QE2 Park development. As our plan will outline there is a need for a Network of fields and based on population forecast growth having an artificial surface at QEII ma and is further supported by its proximity to the new schools, Shirley Boys High School and Avonside Girls High School who will move into the Our experience of operating English Park next to a school shows a significant benefit to the school and a wider community to ensure more k active more often. Having read through the document the Artificial Multi use field is part of the Unfunded Implementation Plan and has a proposed budget of \$ The timing based on the plan presented would not see the artificial Multi Use sports field potentially happening until 3+ years after the Mast We also note that any of the unfunded developments could be subject to inclusion in the LTP. The club is in a position where they would be able to assist financially to bring this part of the QEII Park development forward in the plannin would like to be able to present an option where the club could work alongside council to develop a plan that would see benefits to the club network and to the wider community. We look forward to being able to engage with Council and explore an opportunity of working together
							On Behalf Of: Mainland Football Coastal Spirit FC
							Chief Executive Officer Chairman
561 Ye	es '	Yes	Yes	Yes	Yes	Yes	Introduction I make this submission in my capacity as Chairman of Christchurch Disc Golf Club. Our Club supports the Council's plans for QEII Park in ger specifically their proposal to allow a disc golf course to be installed in the main multi-use area of the park. We believe this will create a value used community resource, at minimal cost to ratepayers. As well as providing useful information to the Council, we hope our submission will other submitters, and indeed to many Christchurch residents. Table of Contents - Our Club - The Game of Disc Golf - Benefits of Disc Golf - Suitability of QEII Park - Money
							Our Club Our Club has existed informally for some 30 years. In 2018 we have been formalising the Club's existence, and are in the process of registering incorporated society (when our name will change to the Christchurch Disc Golf Club Incorporated). After that we expect to apply for the stat charity. We are a simple membership club, managed in the normal way of such clubs, with a General Committee and a set of rules (Articles of agreed by members. Membership is currently small at 29 (only 2 weekends of collecting memberships), but we expect membership to grow There is no requirement to be a member of our Club in order to play. It is hard to know how many active players there are in Christchurch, we number at approximately 1,000.
							From our Articles of Association: 3.1 The purposes of the Club are: (a) to promote, maintain and develop the sport of disc golf; (b) to do anything necessary or helpful to the above purposes. 3.2 Pecuniary gain is not a purpose of the Club. 3.3 The purposes of the Club are charitable, bearing in mind especially: (a) the improvements that disc golf brings to the health and well-being of players, families and communities; (b) the benefits that disc golf brings to wider society (including the potential for reduced youth delinquency, revitalisation of parkland areas, a reduction in littering, vandalism and other anti-social activities, and improved personal safety in public parks); (c) the potential for wide uptake of the sport (including young and old, girls and boys, men and women, the fit and the less fit);

	1	

There are currently 2 disc golf courses in Christchurch:	
- 18 basket course in Jellie Park, Ilam, installed by our Club in March 2015.	
- 9 basket course in Queenspark, installed by the Parklands Residents Association in November 2017.	
The number of players has been growing noticeably since these courses were installed. Our Club has a focus on safety. The following rules are binding on	
members (from our Articles of Association):	
5.1 Members of the Club shall observe (and encourage all players to observe) the international code:	
(a) Play smart. Never throw into a blind area or when players, spectators, pedestrians, or other facility users are within range. Use a spotter.	
(b) Respect the course. Observe all posted rules. No littering, graffiti, or abuse of equipment or flora.	
(c) Represent the sport. Be responsible and teach others.	
The Game of Disc Golf	
Disc golf is a recreational sport played to broadly similar rules as traditional ball golf. However, instead of a ball and clubs, players throw a plastic disc (or	
"Frisbee") into a standing metal basket (which has loose hanging chains to help catch the disc). Players throw from a designated tee towards a target basket,	
and, as in ball golf, try to do so in as few throws as possible. A full course typically has 18 "holes" (fairways with tees and baskets).	
Disc golf "holes" are shorter than in ball golf, and the game can be played in spaces shared with other users, such as public parks.	
Discs are smaller and more streamlined than traditional beach "Frisbees", and fly further. There is a wide variety of different discs (they vary by design, type of	
plastic and weight). Each type of disc has different flight characteristics. As ball golf has different clubs, so disc golf has different discs for different purposes	
(putters, mid-range, drivers). Every player builds a small collection of discs that suit him or her.	
Disc golf is easier (quicker) to learn than ball golf. Rapid and noticeable improvement in skill means that frustration is minimised.	
Disc golf can be played on one's own, in an informal group with friends, at organised times on weekends and summer evenings, in leagues (e.g. as organised by	
our Club), or in weekend tournaments (to which the game is well suited). Players of widely differing skill levels can play together, thus all members of a family	
can play as a group, or an inexperienced player can play in the same tournament as someone with years of tournament experience.	
There is no requirement to book a "tee time", players are free to play as and when it suits them. Not much equipment is needed: a bag of discs and a pair of shoes. Thus the game is well suited to the fluid schedules of modern life.	
shoes. Thus the game is well suited to the fluid schedules of modern life. It takes 50 to 90 minutes to play a recreational round of 18 "holes". Approximately 72 players can be accommodated on an 18 "hole" course at any one time.	
Disc golf started in 1975, with the invention of the metal basket. Innovations to plastic disc design followed in the 1980s and 1990s. Since 2000, the game has	
been growing rapidly worldwide. It is most popular in North America and Northwest Europe. Finland, with a population not much larger than New Zealand,	
has over 700 courses. In the USA, the number of disc golf courses now surpasses the number of traditional ball golf courses.	
There are some 30 courses in New Zealand. In the South Island there are courses in Queenstown (2), Wanaka (2), Dunedin, Invercargill, Timaru, Twizel, Tekapo,	
and Christchurch (2). The game is growing rapidly in the South Island, many of these courses have been installed in recent years, with others planned. The	
Christchurch climate is well suited to disc golf, as the game can be played all year round.	
Benefits of Disc Golf	
Physical health: Disc golf has been described by the New Zealand Heart Foundation as "the perfect gentle exercise for sedentary adults". It is an aerobic and	
low impact sport that can be played at practically any age and level of fitness. It is as vigorous as the fitness and inclination of each player allows. The whole	
body is used, and the sport is good for mobility and flexibility. Throwing a disc is a natural motion, the sort of thing for which the body is designed. It feels good. Motivation to play is high, and the sport scores highly for seemingly effortless exercise. Just spending more time out of doors is known to be beneficial	
to physical health.	
Mental health: Fascination with the flight of the disc takes one's mind away from current stresses and worries. The game is easy to learn, but hard to master.	
Players keep coming back for the never-ending challenges of the game. Disc golf connects people to their natural environment - trees, grass, wind and sky.	
Social health: The game can be played at any level of social participation, from a casual round for one player, family, or group of friends, to organised leagues	
and tournaments. The game is quite sociable, as with other shared pastimes, but also noted for its informality. It is very easy to meet other players on a casual	
basis. Disc golfers are typically very welcoming towards new players and curious bystanders - it is part of the culture of the sport.	
Societal benefits: One of the aims of the creator of disc golf (Ed Headrick) was to design a recreational pastime suitable for delinquent youths of the 1970s	
California counter-culture. Because of its seeming casualness and informality, the sport can appeal to rebellious and disaffected youngsters who have little	
taste for more formally organised sports. Parks which install disc golf courses see a drop in littering, vandalism and other anti-social activities. As low-traffic	
areas of the park become used for disc golf, the park becomes safer for all park users. Environment: Revitalisation of parkland areas (through active use) is a	
stated purpose of our Club.	
Suitability of QEII Park	
The proposed park is very well suited to disc golf. In particular it meets the following criteria:	
- Close to centres of population, ideally within walking distance. (The north, east and south boundaries of the park are areas of relatively dense suburban	
housing, and a large new high school is being built in a corner of the park).	
- Fairways must be of sufficient interest to play disc golf, with a suitable variety of terrain and obstacles. Completely open spaces are not suitable, because too	
dull. (The Park has many mature trees and bushes, which make ideal obstacles for disc golfers, requiring skill, accuracy and cunning plans to overcome. There are also many small undulations in the torrain adding interest and possibilities. Note that no special landscaping is required to support disc golf, just require	
are also many small undulations in the terrain, adding interest and possibilities. Note that no special landscaping is required to support disc golf, just regular grass cutting and tree management.)	
- Easy access and parking. (QEII Park is near to main roads with good access from other parts of the city. We expect the on-street parking on the north and east	
sides of the park to be particularly useful to disc golfers, whom we do not expect to compete for the main car parks near the sports complexes. A round of disc	
provide the part to be particularly address when the donot of policity when we donot corport to complete for the manual parts field. The applies completes. A found of disc	1

						Youth-Friendliness	The Draft Master Plan encourages co-creation of interpretation with the	-
						Below the young people auditing the space answered the consultation document questions and have provided their opinions, ideas, recommendations, and vision for QEII Park.	community.	
						2 - Have your say consultation document questions	Interpretation comes in a variety of forms with many possibilities.	
						After completing the Youth Friendly Spaces Audit the Team Leaders came together to discuss the consultation document questions. They felt that the QEII Park Master Plan did improve access to the park and overall does offer a good range of things to do. The Team Leaders did not believe the Plan has the right mix of facilities but is overall positive about the Plan improving the look and feel of the Park as well as the natural environment.	The Draft Master Plan has an events space, including mounding.	
						Is there anything currently unfunded that you would like to do sooner? The Team Leaders felt all the walkways in a funded area should be done at the same time and that the entrance way should be done first to balance the back- entrance development. We felt that doing the front entrance would help the space be more inviting and welcoming.	Signage around the park will be included and completed alongside entrance way and path	
			I			3 What funded project would you be prepared to push out to make this possible?	development.	
						The strip of trees in the overflow car park area and Ascot Avenue back entrance spot. 3 - ReVision Youth Audit Results	Drinking fountains are proposed at both the play	
						Safety	space and sports change facilities.	
						Any space that young people frequent should be safe, and when you get it right for them, you've probably got it right for everyone. The Team Leaders looked at the CPTED Principles (Crime Prevention Through Environmental Design), location, safe 'hanging' spaces and waiting/transition areas. The Youth Audit Team Leaders agreed that their needs to be better connection between Taiora and the new Gymnastics building in the form of a clear walkway to make it safer for children and young people walking between the facilities.	now be proposed for	
						In line with the CPTED Principles, the Team Leaders would like more covered areas around the park near the main attractions such as the sports fields and play space. The Team Leaders didn't feel the space would be very safe at night with the limited lighting along the pathways and would like the planners to consider more		
						lighting on the main thoroughfares. Although the current lighting plans is based on a CPTED Report, we think another CPTED report once the Park is more open and busier would be beneficial to see how busy the main thoroughfares are at night and if more lighting is needed. The Team Leaders also wondered how the running track around the play space will function with the movement of people in and out of the space. If people are	open	
						running around the track and children and young people are coming and going from the play space that could be a potential hazard.		
						Appealing A space is going to be more appealing and successful when people want to use it for its intended purpose.		

			When talking about appeal the Team Leaders looked at the social credibility of the site, the space being engaging and involving youth, and spaces for youth. Overall the group of young people completing the Audit felt the plans looked good and were confident they would like to and that young people would use the space.
			4 The young people completing the Audit came up with several ideas to make the Park more appealing including:
			 Talking seats that talk about the history of the park when you sit on them. Storytelling aspect could:
			• Be around the overall park
			 Include individual memories e.g. I remember when I loved A big wall for people to put hendprints on only on opening day to mark "new history".
			 A big wall for people to put handprints on only on opening day to mark "new history" Graffiti /Art Wall for public use to fill the Park with more creative spaces
			 Signage around the Park explaining what spaces are, why the park is local now, and basically explaining the vision of the Park. Signs could
			 Historical movements
			 Recent history
			\circ Information about huge moments at the QEII site
			One young person said, "How cool would it be to have a sign saying, 'Welcome to QEII'!"
			Another Team Leader highlighted, "This ground has hosted many famous artists including The Eagles, Beach Boys, Kenny Rogers, Dolly Pa
			David Bowie and the Red-Hot Chili Peppers! Often because QEII is seen as a sports and recreation facility but we should show off the music
			arts scene that has been on QEII's grounds". As well as that the young people felt it would be awesome as a place for future outdoor concerts. Polyfest uses outdoor spaces and this site
			for it. The team believed things like this would help the venue be more socially credible.
			Accessible
			Any space needs to be accessible - all young people should be able to use it, even if their circumstances are different. To assess the accessi
			Team Leaders looked at physical accessibility, pricing and low-cost food options, and connectivity to other key youth spaces. Based on the
			team were happy that it will be accessible.
			Recommendations:
			 Have signs to direct people around in easy to see places
			Drinking fountains are needed in many spots in the Park
			 Have the bus shuttle going to Taiora on Sundays Lots of park benches so people can sit and watch sports
			The young people felt it wasn't easy to get to the Park via public transport especially as one young people coming from North Canterbury a
			Audit had to catch 3 separate busses. There was one shuttle that came straight to the front of Taiora, but that doesn't run on Sundays. The 135 shuttles should run on Sundays as more young people are likely to go to the Park on a Sunday and utilize public transport.
			The should run of sundays as more young people are likely to go to the Park of a sunday and utilize public transport.
			5 Resourced
			A space that is well-resourced with young people in mind is one that will be well-used.
			When auditing the space and considering resourcing the Team Leaders looked at Wi-Fi, pricing, and appropriate amenities. It was also imp
			multi-use aspects of the Park and the young people completing the Audit recommend the below items and activities to make the Park well
			people: (most common ideas bolded)
			 Outdoor speakers (e.g. like the Dance-o-mat) Outdoor stage for events
			Specific areas for tree climbing
			 Small playground or least swings closer to Taiora for families and children using the pool
			• If the play spaces tell a story of the history of QEII Park it would be good to have this explained on signs around the Park
			• "It would be cool to have a full-sized basketball hoop and the ability to turn it around to become smaller"
			 Young people liked the basketball court, but there was heavy emphasis on it being bigger and have a full-size court. Option to have other practice, or more than one group of young people can use the full-size court at once.
			• Needs two full size courts e.g. Youth (12-24) and Children (under 12s)
			 The Play Space is quite a big area, so a full basketball and netball court would be nice
			An orienteering course throughout the adventure trail designed by youth
			 Tennis courts Have a community garden near the community center
			 Have a community garden hear the community center Pump track
			In terms of appropriate amenities, the team liked the number of public toilets but thought it would be cool to have solar panel tables to ch
			phones/computers.

					In terms of Wi-Fi the young people felt the Wi-Fi at Taiora should cover most of the park especially the populated areas. The current Wi-Fi strength needs improvement to host the number of people trying to connect. For the Adventure Trail, the young people wanted activities that are engaging in the space such as fossil searching and orienteering. The team wondered if		
					there are options to include old signs from the previous park activities in the new pathways.		
					Youth-Friendly You can tell a youth-friendly space by the feeling you get when you walk in - young people being wanted here! The Team Leaders looked at vibrancy, the Park being welcoming and embracing young people.		
					6 When looking at making the Park youth-friendly the young people looked at how space reflected young people's culture. This includes: • Having Pou at the entrance (like at Victoria Square)		
					Having the cultural narrative reflected in the entrance		
					 The team were a massive fan of the indigenous planting More biculturalism reflected in the overall design 		
					Woven mats in the pathways like the Central City Promenade		
					Having Pasifika design elements in the facility		
					General Feedback		
					General feedback from the Youth Audit Team Leaders and young people completing the audit included:		
					 Name idea for park - Commonwealth Playground "I would have loved this when I was around 5" 		
					 "The play space should be built all at once so there is no drama and no construction near the half-built part" 		
					• "Yay for fitness trails/ outdoor equipment"		
					 "Very happy about the location of Sport Facility charging rooms" "Multi-sport field - could it be made into multiple sport spaces e.g. football, hockey, netball" 		
					• "Loads of rubbish bins (everywhere)"		
					• "Have remembrance area/s more central"		
					The team also thought about future parking for students at the schools on the Park and said,		
					 "If not QEII site, where?" "Will parking have an impact on residents with street parking being used like current issues with University?" 		
					• "How would a 180-minute carpark affect the users of the gymnasium?" (if it could deter high schoolers could it also deter users?)

Travis and Frosts intersection. The track out to Frosts road is currently greyed out in the plan, this access is important access to the park. We suggest that stravel paths to add from the park need to be safe and user friendly and make the travel paths safer to promote active transport. eg 50k Zone on frosts road and safer bike routes through QEII. Travis and Frosts intersection. The track out to Frosts road is currently greyed out in the plan, this access is important access to the park. We suggest that stravel paths that goes around the park is essential for active recreation. For this to be user friendly it needs to be wide enough for bike, scooters and prams to use comfortably and pass each other safely. There are provisions for enabling paid parking in place but not currently activated at Taiora QEII. Will parking be charged and	is going in across Frosts Road next to the roundabout. Speed is also proposed to be reduced to 50 k/h as well as school speed zones on Bower and Travis. Buses (135) currently come through the park and stop in front of Taiora. The vehicle access from Frosts Road is deemed unsafe for vehicle movements and would require substantial upgrade. Parking is proposed to be managed through time limits, at no cost. The toilets at Ascot Community Centre would	Canterbur y

20585	Yes	Yes	Yes	Yes	Yes		the same time i.e. eight teams worth of changing. We recommend separating the playground and the half court. The audiences that these two facilities will attract are different-teenagers do not want to be hanging out with little children and families experiences at the playground could be disrupted by teenagers. We support the retention and re-purposing of the old Christchurch School of Gymnastics building for sport and recreation purposes once their new facility is operational. We also support the ability for Christchurch School of Gymnastics to exit out of their old building with little or no financial contribution from them for remediation. This will allow them to continue to invest in recreation and sport delivery for the area. Clarity of the remembrance area:- is it Earthquake related or is it related to the sporting history of the park and celebration of QEII? If this is a remembrance area we recommend somewhere quieter and more attractive in the park away from the busy entrance. The change in Bunds to accommodate field 2: It is understood that there is asbestos buried under these bunds - we recommend considering this when making changes to the field. Staging Plan Suggestion to complete the entire playground and basketball court in stage one. Fund this by making southern access way in stage 1 and have access via existing road to car park for Taiora QEII carpark. Keep the walking and bike track as part of stage 1 development, as this is key to keeping the loop of the park. Commercial Use To enhance the flexibility of the site and the ability to use the land for recreation purposes that Reserve land is not able to be used for, we suggest looking at making provision for commercial activities that provide sport, active recreation and play opportunities on the site We also support Chris Bonds QEII Fun Park proposal for the development of multi-use sport and recreation facility incorporating indoor mini golf, cage batting for softball, baseball and cricket, a driving range and multi-sport simulators to be situat	The multi sports field is a provision for future use and is not currently funded. The sports changing facilities are considered to be appropriate for the expected level of use. Due to significant feedback for free to use spaces, the Draft Master Plan does not propose an area dedicated for commercial activities. Transport projects on	Graham
20000	105		103		103		More rubbish bins in the area! The roads!!! - potholes re-surfacing. Gutters sprayed/sucked – swept. Grass berms mowed - the kept ones.	surrounding streets are not included in this plan.	Partridge
20586	Yes	Yes	No	Yes			Generally a good plan. I have some concerns about the children playground design. The seating is lacking between swings (2) and running track. There is also lack of seating between (12) swings & running track. Seating not only provides a rest place for grandparents but it also acts as a barrier to stop adventurous children running onto racetrack etc. It is good the tube slide faces the seating area but it also faces west which means it may heat up during the day. There is nothing to stop children running down the mound onto the racetrack. Just a suggestion: Id you created CHESS boards or some BEACH VOLLEY ball courts you may be able to recoup costs by renting them out. Neither activity would require building costs associated with earthquake land. Push out - Disc golf as I understand that there are private interest wanting to fund golf activities on the other side of Frosts Rd.	There is seating around the sandpit and on logs etc. Note that the race track is a play feature and we will encourage children to use it. The slide is plastic and will not heat up. The mounds will be designed to allow children to move safely across them. We know from community engagement that commercial activity is not a priority for the park. Disc gold is of low costs, so pushing out would not free up funds for other activities.	
20587	No	No	No	No	No	No	No ideas but concerns as outline in attached submission. The Ascot Petanque club is very concerned about the proposal to remove the 1.8 metre paling fence behind our playing area (called Pistes). I outline the following reasons against the removal: 1. The fence is required for security of our pistes. This keeps people, cars, bikes and doges off our pistes which could easily be damaged and need repair at our costs. We already have problems with people or children pulling up the strings which surround each piste on the playing area. 2. We need the fence and trees for protection from the winds and weather. 3. We use the fence to hang our score boards and piste numbers on as it makes them easy to see and read. 4. Some of our older members need the fence to lean on while waiting to play from that end. The Ascot Petanque Club is a long standing club in the area having started in 2001, we have currently 64 members and most play on 2 club days per week. We also have 10 tournaments a year on Saturdays; 4 of these are invitation tournaments. We invite players from all the other clubs in Canterbury to play in the invitation tournaments which are always very well attended by those other clubs, especially from the Ashburton club. We have up to 40 people playing these days. For the reasons highlighted above, we would prefer that the paling fence stays in place, or is replaced with a similar structure. We are also concerned about the security of the building when the whole area is opened up. We store all of our gear in a locked cupboard in the building and it could be broken into. The building has floor to ceiling glass windows all round that could easily be broken to gain entry to the building	Staff will work with the petanque club to find appropriate solutions to these concerns.	Ascot Petanque Club

19128		No	No	Yes	Yes	Yes	Bring back the diggers and outdoor speed slides and have an amphitheatre for outdoors concerts, talent quests etc	Due to significant early feedback requesting free to use spaces the Draft Master Plan does not propose an area dedicated for commercial activities. The Draft Master Plan has an events space, including mounding.	Claire Phillips
19129	No	No	No	No	No		You're going to create a cold area no one will visit, Christchurch people don't want to be outside during winter months Christchurch community are introverted bunch to the outside, we need better schooling in the area this will bring families out that way, obviously that's what drives people to move learning facilities is a big one. How about tertiary studying facility. All of it is a lack of creativity and feels just thrown on a plate not thought out. Re do the whole thing with thinking in mind how to bring families out this way.	There are two secondary schools under construction next to the park. The Draft Master Plan was developed following extensive community engagement and reflects what the majority of respondents wanted to see delivered	Jess Evan
19130	Yes	Yes	Yes	Yes	Yes	Yes			Jane Houghtor
19134	Yes	Yes	Yes	Yes	Yes		I did not say no, however I question the cost allocated to changing rooms: 1M! That is a lot of money, same with the sports fields: 600K that needs to be though through: can we phase it? Do less of these? Natural trail as soon as possible: open to all public (not only sports org) Sport fields later : there are brand new sports field in Hagley park that are not fully used do we need that many sports fields or a better use of the one we have ?	Council requires changing facilities at all senior sports grounds. The cost of the sports field includes mounding to make this flexible for use during events. Because this lit field is in high demand it is considered a priority to the wider sports field network.	Nathalie LeBras
19151	Yes	Yes	No	Yes	Yes	Yes	The playground need to be cranked up to Margaret Mahy Playground levels of awesome. Yeah it'll cost a small fortune but that park is goddamn awesome and we need more of them. Push out - any historical stuff I feel a large chunk of people just don't care about it.	This playground will not be a 'destination' playground and is only to service local community needs. New Brighton has a new high-end playground for the local community. The commemorative remembrance area off Travis Road is currently unfunded.	Michael Borland
19176	Yes	Yes	Yes	Yes	Yes		I think the plan is great! I would however love to see the basketball court up sized to a full court. Basketball is currently the fastest growing sport in NZ, and poised to be the most popular within high school ages by 2020. I see other upgrades for field sports which will encourage people to come and use the facilities however only a half court is not overly attractive to those that play basketball. To really meet the aim you're wanting with getting more people out, active and using the facilities up sizing the basketball court to a full size court (fiba markings) is a future proofing no brainer for our community. I also have concerns that the play area, while really good looking, may not have enough to keep older children entertained and could possibly do with a few more 'advanced' pieces of play equipment to cater for older children.	A full basketball court will now be proposed for consideration. It is our approach that integration of age specific play spaces has positive outcomes for	Matt Barnes
19261	Yes	Yes	Yes	Yes	Yes	Yes			Marc Stevensor
19275	Yes	Yes	Yes	Yes	Yes	Yes			Lisa Rollinson
19283	Yes	Yes	Yes	Yes	Yes	Yes	I would love to see the Adventure Nature Trail done sooner Push out - Open space/multi use/disc golf	Staff recommend investigating efficiencies to achieve the nature trail sooner. The open space and disc golf are low cost, while the multi space is currently unfunded.	
19284	Yes	Yes	Yes	Yes	Yes	Yes	Do sooner - Nature Trail Push out - Disc golf	Staff are investigating efficiencies to achieve the nature trail sooner. The disc golf is low cost.	Cameron McNabb
19297	Yes	Yes	Yes	Yes	Yes	Yes	Do sooner - Adventure nature trail	Staff are investigating efficiencies to achieve the	Kaylene

19366	Yes	Yes	No	Yes	Yes	No	I would like to see an outdoor swimming pool added, also a cycling track around the park suitable for young kids to ride safely, more parking space so there are no parking restrictions. A boating lake would be nice too.	complex soon to be constructed in New Brighton. A cycling track is provided around and through the	Helen Marginsor
							Do sooner - Parking, nature trail	park. At this stage parking is deemed sufficient but will be monitored. The wetland pond areas may be	

						Push out - Sports fields	appropriate for model boating. Staff are investigating efficiencies to achieve the nature trail sooner. However, this lit field is in high demand it is considered a priority to the wider sports field network.	
19405 No	No	No	No	No	No	 1 fix the pool complex you have stuffed up. It is built for babies, not adults. Too cold, two pools short for length swimmers and a teenage play pool, and is used for straining shit from nappiestoo many closures. 2 get the golf course and driving range up and running. 3 time limitations is the stupidest idea yet. You have stuffed up and now need to try a fix that will stop pool usagedumb! 4 more natives planted out 5 stop our myopic focus on kids. Link the track to Travis swampland. Via a fly over would be great. 	The staff at Taiora are aware of these concerns. The space required to re-establish a golf course and driving range on the site, significantly impacts the ability to provide a park that meets the needs of the wider community. In addition, land quality is no longer able to support this activity without significant investment. Over 7000 native plants are planned. The only child specific element in the plan is the playground, which takes up very little room and costs only \$200k out of a budget of \$3.4m. Any proposals for works outside of the park boundaries are not included within this plan.	
19407 Yes	Yes	Yes	Yes	Yes	Yes			Rachel
19467 Yes	Yes	Yes	Yes	Yes	Yes	Do sooner - Larger pool complex	The need for a larger pool complex is not currently identified within the network plan.	Pettigrew L Richards
19572 Yes	Yes	Yes	Yes	Yes	Yes	Push out - Multi sports field fenced & lit Do sooner - Adventure Nature Trail	Neither of these projects are funded at this stage. This is a practical suggestion and staff recommend	Jacqui
						With the help from the community, working bees could be held to make the tracks, as was done with the original track around the park. Would be keen to help.	investigating potential efficiencies and the landscaping cost upfront that would be needed to achieve later savings.	Herron
19591 Yes	Yes	No	Yes	Yes	Yes	Looks like playground does not have enough shaded spaces, would be better to have some artificial shade elements around the sandpit and Nature Play areas at least. They could only be installed during summer months, and removed for winter. See attachment below this table	1 55	Peter Pletnyakov
19719 No	Yes	Yes	Yes	Yes	Yes	I am concerned about older people who may get the bus to QE2. What provision has been made for buses to come into the facility. Also disabled parking and covered areas in the event of rain.	Buses (135) currently come through the park and stop in front of Taiora. Disabled parking will be provided throughout the car parks. However, covered areas are not a priority.	Anderson
20073 No	Yes	Yes	Yes	Yes	Yes	I think the Anzac Drive/QE2 Drive roundabout is currently too dangerous for cyclists and pedestrians and will only get worse when the two new schools open. The 70kph speed limits need to be reduced to 50kph to give people more time to get across the road or else put lights in as they did at Marshlands Road as that roundabout was also dangerous with higher speeds.	A new signalised crossing is going in across Frosts Road next to the roundabout. Speed is also proposed to be reduced to 50 k/h as well as school speed zones on Bower and Travis.	
20077 Yes	No	No	No	Yes	No	Remove training area & sports fields to red zone areas near river. Make these areas more family orientated to family use. Larger wetland areas for picnics, model boats etc. Include ice rink & curling rinks, hockey etc. Larger children's play area as per town playground. More car parks in these areas fitness tracks ok, make this whole area different to others in Christchurch.	Due to strong feedback for free to use spaces the Draft Master Plan does not propose an area dedicated for commercial activities.	Richard Evans
						Do sooner - Ice rink & curling area buildings suitable, for karate, fencing & similar sport available at low cost for these sports, also bumper cars type activities. Push out - All sports fields	This lit field is in high demand it is considered a priority to the wider sports field network	
20127 Yes	Yes	Yes	Yes	Yes	Yes			Lauren
20128 Yes	Yes	Yes	Yes	Yes	Yes			Highsmith Rick McKinnon
20163						 Tena koutou I would like to add my support for the proposal to develop a family friendly recreation facility on the site of the old QEII Fun Park and Golf Range. We are noticing that many children and families are choosing to engage in sedentary recreation activities such as gamin causing a number of social and emotional problems. For many of our families there are financial barriers to children engaging a range of sports and activities. There is strong evidence that physical activity, less screen time and positive social interaction impacts positively on health and wellbeing. Earlier this year Helen Miles spoke to our Parent Teacher Association about ways the Council could address the decline in children engaging in play. While there were some suggested initiatives we saw barriers around how these could be implemented and sustained. A proposal such as this overcomes many barriers we envisaged. The affordability of the activities, with the added incentive of free holiday events, would certainly provide the children and families in our community with opportunities to spend active time together. We encourage the Council to support the development of this initiative. 		Belfast School

20506 Yes	Yes	Yes	Yes	Yes	Yes			Richard Derham
20502 Yes	Yes	Yes	Yes	Yes	Yes	I would like to see lots of plantings of BIG trees- kahikitea, rimu, totora, oak, etc that will span many generations. We are too quick to cut down big trees. Do sooner - Tree plantings Push out - Some of the minor walking tracks in the western zone	We are planning to plant over 7000 trees within the master plan. Work will start as soon as practicable.	Dan O'Sullivan
20501 Yes	Yes	Yes	Yes	Yes	Yes	What exactly is meant by 'multi-sport' field? Is it a grass field, astroturf (sand or water based)??? There is a total lack of turfs in the East of the city (particularly for hockey)	This multi-sport field will provide for a range of codes and can either be grassed or artificial. This decision would be made when funding is available and based on need.	Parkes
20499 Yes	Yes	Yes	Yes	Yes	Yes			Chris Mance
20498 Yes	Yes	Yes	Yes	Yes	Yes	Do sooner - Demolish eq damaged buildings? For safety and appearances. Also to prevent damage to areas that have been landscaped, paved etc if it is done after other projects? Salvage company may do on behalf? Push out - Grassy Mound	Full demolition of EQ damaged buildings is planned to begin in 2019. This is funded outside of this project budget	
20476 No	No	No	No	No	No	I strongly encourage the council to leave room for a 50 Metre pool at the Qe2 site as the new pool facility is inadequate now let alone once the new high schools are completed on the adjacent the site. This would be a true boost for the people of wider East ChCh. This would benefit the east far more than any Lake proposed for the area which will simply reduce road access for those actually living in the area and more prone to threats from coast eg Tsunami alerts. I note this survey has framed questions that require a yes- no answer this seems highly inappropriate - you should have either N/A or No Opinion on this as an option.	expansion of the facility in the future.	Benjamin Jamieson
20449 Yes	Yes	Yes	Yes	Yes	Yes	I support the installation of the Disk golf course. My family and I have been playing Disk golf for about 3 years and have found it is sport for all people old or young. With minimal to no ongoing maintenance cost to the council, I would like to see the Council fund at least the purchase of the equipment, which is less than a children's playground, as the design and installation could be done by local players.	Staff support this recommendation.	Grant Cosslett
20439 Yes	Yes	Yes	Yes	Yes	Yes	I would like the proposed disc golf course completed as soon as possible because the Jellie Park course is becoming congested. The sport is wonderfully easy to get into and is spreading throughout my social circle and encourages us to spend more time in the park than any of us have since childhood!	Staff support this recommendation.	Patrick Sullivan
20433 Yes	Yes	Yes	Yes	Yes	Yes	I'm a big supporter of the disc golf course		Nick Jackson
20432 Yes	Yes	Yes	Yes	Yes	Yes	Do sooner - Yes! Disc Golf is the ideal activity while other things are taking place in the area. Not only will it support up to 90 or so people at any one time, at a very low capital cost, but it provides another physical activity for local school children - of whom there are set to be more than 3,000 new ones very shortly. Nothing needs to be pushed out to accommodate disc golf.	Staff support this recommendation.	Vortica Disc Golf
20407 Yes	Yes	Yes	Yes	Yes		The kids play could be bigger as there are quite a few young kids in general area.	This playground is sufficient to service local needs. New Brighton has a new high-end playground for the local community.	Matt Ward
						Push out - Fitness stations, picnic area near Travis Road, and possibly Multi-sports field due to facilities at schools.	unfunded, we know from prior community engagement that the fitness stations are an important aspect of the plan.	
						The paths need to be done asap due to needs of students accessing the new school site.	have been prioritised, with school use in mind. While the picnic area and multi-use field are currently	
						school would require cyclists to cross the main road/driveway into Taiora, and students would more than likely cycle through the planned carpark close to the existing CSG building. The other gate closer to Taiora would encourage cyclists to cut through the main carpark & bus parking areas. Access into the school for cyclists closer to the secondary entrance seems to be good and sensible - the others are asking for trouble! Apart from this, fantastic plan and great facility to engage the community - well done!		Collins
20391 No	Yes	Yes	Yes	Yes	Yes	A major concern is the access to the schools for cyclists using the paths from Ascot Ave & Frosts Road. It appears that gates into the	stage 1 will be completed as soon as possible. Staff are interested in other funding opportunities for the picnic BBQ facilities and will expedite if possible. A shared use path will take students from Frosts Rd to	Kim
20243 163	163	NO	163	163	NO	The outdoor playground & picnic areas should be started asap	identified within the network plan. An outdoor pool will be provided as part of the new complex soon to be constructed in New Brighton. The playground	Mora- Kelley
20206 Yes 20243 Yes	Yes	Yes	Yes	Yes	Yes	Do sooner - Nature trail Needs another pool maybe a wave pool for back up due to closures. An outdoor pool would be a great option to.	Staff are currently investigating options and the cost upfront that would be needed to achieve later savings. The need for a larger pool complex is not currently	Wendy Biggs Trina

20510 Yes	Yes	No	Yes	Yes	Yes	Grass sports grounds are impressive however this is beneficial for rugby touch softball soccer golf, track and field. It does not include netball or basketball. There are limited public netball and basketball courts on this side if town especially netball. We have alot of whanau in the area that travel to Hagley for trainings. Having a local open space would encourage our tamariki to train and participate more.	A full b consid space. Park o
						Ensure the car parking is adequate	the cur
						Push out – - Event space - Bike track - although it looks amazing and my family are keen cyclists, bottle lake is very close by. Or a smaller cycle track like at Rawhiti School is in place instead of playground. - playground. New Brighton park has just been completed and is amazing. a simple alternate natural play space could be an alternative.	
20516 Yes	Yes	Yes	Yes	Yes	Yes	 I do believe that the hard earthworks and track work proposed in stage 5 could be done sooner - say in stage 2 - the process of voluntary community planting successfully carried out at Travis could commence so the trees would be in place when money became available to complete the actual landscaping. The native plantings planned in conjunction with those at Travis will create a fantastic asset to the local community and in particular to the nearby schools. I believe all components of the plan have merit in their own way so would not like to see my preferences push out others, I just believe if elements of stage 5 were brought forward it would enable time savings in the future and will better facilitate community involvement 	This is investi be nee
20525 Yes	Yes	Yes	Yes	Yes	Yes	 1: Young people in the 10 to 15 year group need challenging interactive activities to engage their interest and form a connection to an area. There doesn't appear to be anything like this in the plan. Simple things like a climbing wall, a flying fox, a jungle gym type activity similar to Spencer Park. These type of activities encourage family participation. 2: Dispersing the major activities from QE11 to throughout the city has taken many sporting opportunities from the local cohort of young people from the area. I have had feedback that some young people found it too hard to travel to these distances to continue their sporting choices Some items costed in the first paid for section appear to be earthquake costs and should be paid from Insurance or EQC funding leaving the MOE monies for items from the unfounded section. 	A large playgro money
20531 Yes	Yes	Yes	Yes	Yes	Yes	Push out - The emphasis on passive long term beautification which could be funded as time passes. The Parklands Residents Association generally supports the plan.	
20539 Yes	Yes	Yes	Yes	Yes	Yes		
20544 Yes	Yes	Yes	Yes	Yes	Yes	Would it be possible to have some metal exercise machines (there are a couple in Hagley Park) to replace exercise stations around the old perimeter track? Love the plans for western (Frosts Road) side. Makes sense to allow wetlands to exist here - low-lying, flood prone anyway. Would be great to start work on paths etc soon. New schools and community could become involved in planting etc and it would seem like 'their place.'	Staff a

is a practical suggestion and staff recommend stigating options and the cost upfront that would eeded to achieve later savings.	Travis Wetland Trust

							The Travis Wetland Trust proposes that the hard earthworks and track creation is brought forward. This will allow the adjacent schools and the community to be involved in the planting of the area. The Travis Wetland Trust and the Christchurch City Council Ranger team have shown how successful community partnerships can be. Community involvement, including the schools, in this project will foster a sense of stewardship and community buy in. The natural area will be adjacent to the proposed eco-sanctuary and thus be a recipient of vulnerable wildlife foraging from the fully protected sanctuary. This is called the halo effect and its success depends on managing predators in the surrounding habitat. Therefore, the Travis Wetland Trust suggests predator trapping is an important consideration in managing the whole QEII area. This again is something the community can be involved in and has shown to be very successful in other communities such as Predator Free Sumner.	
20556		Yes	Yes	Yes	Yes	Yes	Draft QEII Park Master Plan Avon-Ōtākaro Forest Park (AOFP) is a community group set up to promote a forest / wetland park in the Ōtākaro Avon River

	1 1

20576 Yes	Yes	Yes	Yes	Yes	Yes	Mounded Area I am delighted to see this area as a replacement for the cricket oval that was such a pleasant place to be in. The undulating Iandscape this provides is exciting to small children and it hugs community events. I would like extra mounds to be added where possible in the park sepecially in the adventure nature trail. They provide a challenge for a child on a bike, a different view and breal up areas where people can find their own place to picnic or play. Local Play Space I would guestion how the sandpit would be kept free of cat poo with residential houses close by. How are these monitored for buried broken glass and other dangers? This playground will be well used and is close to an entrance that suits a natural flow of people from Parklands. Open Space/Disc Golf As a member of Parklands Residents Association who has been working on developing a Disc golf course at Queenspark reserve, I was concerned the proposed course at QEII would be of detriment to the work we had achieved. However as the Queenspark Course is 9 holes and the QEII is 18, I feel they are quite able to be together in these eastern locations. It is worth noting the speed and distance that the discs can fly and as such pathways for walking must be at a distance from the disc golf course. Ascot Community Centre This building should be a well-known asset for the area but it doesn't seem to have the feeling and use a community space should. I support the re orientation of this hall and linking it to picnic/BBQ areas and the added range of sport offered by the petanque and half court. Walks through the Park It is good to see a number of different routes to take through the park. Could these all be measured and labelled for their distance a it is an important choice for people to choose a track with a known distance to run or walk. Loop walks are most favourable. Adventure Nature Trail. Ivee the idea of this area. It will be a great asset to have the selected that have a noted purpose such as harakeke for flax weaving events etc. I would	e s Projects for local roads fall outside of this projects scope. Directional signs will be installed as path networks are developed. Path development has been prioritised based on anticipated school use.	Christchur ch North East Secondary Education Committe e Inc.
						Plan. We believe these interesting and informative consultations which were available over different days during the year have given locals the opportunity to have their thoughts, dreams and voices heard. It is interesting to compare the Draft QEII Master Plan with NESE's submission to the QEII Park Land Sale Consultation in March 2016 We are pleased to note that almost all our requests and suggestions are included in the draft plan. A copy of our 2016 submission is attached below for your reference. Overall, we support the Draft QEII Park Master Plan 2018. We have a couple of points we wish to have considered while the plan is finalised. We are pleased the old cricket oval feature has been replaced by a new grass training field & events space. This will be a versatile space. The field measurements are not on the plan. We ask you to confirm that the training field is a suitable size to ensure the field could be used for Aussie Rules, Cricket, Ki o rahi, and other lesser known cultural sports. We anticipate that the mound slopes would be similar to a cricket oval basin. If not, we ask that the mound side slopes not be too steep. Our request for easy access to the park from all directions has been catered for. Including bus access and interesting walking routes will encourage people to leave their cars at home, minimising private transport where possible. The paths will allow secondary school students to walk home through the park in many directions. We would like to promote that some sports fields and play spaces might be available free of charge to use for recreational sports that have minimal funds available and which have cultural significance. These might include Ki o rahi, social rugby games by church groups and family fun events. This concept supports the inclusion of communities where many activities played require players to bring little equipment beyond a ball. We wish to ensure that there is a place where all schools can meet and hold tournaments etc. Our community looks forward to the reinstatement of	More trees are being incorporated for shading.

20599	Vos	No	No	Vos	Vos	No	 created opportunities better suited for the commercial uses proposed. We ask that tracks through the park have a ring route where possible. Ideally the length of intersecting path routes would be marked. Distances offered need to allow the public to choose a route that challenges them. The previous QEII Park circular route enabled multiple circuits to be run to achieve the length of a half marathon etc. A return of this feature is much desired by members of the running community. Park maps and signage should enable runners and walkers to easily select a route through the park where single and multiple circuits can add up to known popular distances. Ideally, shade provided by the existing healthy trees should be considered for placement of seating and information boards beside the tracks. QEII Park will become a valued community asset, bringing enjoyable recreation back into our community. We strongly encourage the Council to prioritise allocation of funds in the long term plan to achieve this Master Plan promptly. Please ask our community to contribute time, energy and monetary donations towards achieving a revitalised QEII Park faster. We ask you to focus your energy into realising this Master Plan promptly, ensuring it progresses well, and is kept on schedule. 	5	Margarot
							We support no additional private use of QEII Park. We wish the remaining park areas to be available for the public to enjoy. We have recently heard different ideas for commercial use of the areas and wish to state our opposition to this. We believe the Red Zone has

Eco Action Satellite Nursery Kit and draft agreement.

Supplied by Christ's College Eco-Action Club,

School requirement- 4x5m area preferably on solid hard surface with a garden tap within 20m. The area should be sunny and the water runoff from copious watering should not form a hazard. Agreement to pot the plants on and grow them till large enough to be planted out or sold.

Agreement to reimburse Eco Action Christ's \$750 if enough funds are raised from plant sales (suggested price between \$15 each planted by the club as a donation down to \$8 each if straight sale) Agreement to return 50x50 native tubes as soon as practicable to allow the next seasons plants to be pricked out.

Agreement to purchase next years replacement seedlings from Eco Action Christ's for \$1 each.

Agreement not to collect or propagate any non eco sourced seed themselves other than that provided to them by Eco Action Christ's.

- Kit supplied
- Irrigation timer pipe and sprinklers on stands x 2.
- Weedmat 4mx5m (if required)
- 2x240 litres of potting mix (Potting mix ex CLS Ltd Belfast)
- 400 new PB3 bags
- PB3 bag filler stand x5
- 400 approx. plants (representative sample as below)

TOTAL \$750

Installation as below

- ON LOAN from Christ's Eco-Action Club
- 50x50 native tubes x400 and associated tray stands x 6
- 2xBlue 240L wheelie bins
- •

Representative installation

Trees supplied as 50x50 harve tubes (plastic tubes and trays to be returned to chirist's Eco Act								
Cabbage tree	Cordyline australis	X 25						
Taupata	Coprosma repens	X 25						
Karamu*	<u>Coprosma robusta</u>	X 25						
Kowhai	Sophora microphylla	X 25						
Wineberry*	<u>Aristotelia serrata</u>	X 12						
Lowland ribbonwood	<u>Plagianthus regius</u>	X 25						
Kanuka	Kunzea ericoides	X 25						
Purei	<u>Carex secta</u>	X 25						
Ake Ake	Dodonaea viscosa	X 25						
Mountain ribbonwood Houhere	Hoheria angustifolia	X 25						

Fivefinger*	Pseudopanax arboreus	X 25
Horoeka Lancewood	Pseudopanax crassifolius,	X 25
Flax (mountain)	Phormium cookianum	X 25
Flax (lowland)	Phormium tenax	X 25
Kohuhu	Pittosporum tenuifolium	X 25
Mingimingi*	Muehlenbeckia astonii	X 25
Putaputaweta	Carpodetus serratus	X 25
Rohutu	Lophomyrtus obcordata	X 25
Tarata*	Pittosporum eugenoides	X 25

Trees supplied as 50x50 Native tubes (plastic tubes and trays to be returned to Christ's Eco Action)

	Coprosma crassifolia	X 25
Broadleaf	<u>Griselinia littoralis</u>	X 25
