

HALSWELL WARD PROFILE

February 2023

The Halswell Ward includes the suburbs of Halswell, Wigram, Aidanfield and Kennedys Bush. The ward is one of the largest urban growth areas in the South Island with most of the housing in the area being modern, with few social housing facilities. The Council's South West Area Plan also guides development in this area. The many new subdivisions in the Halswell Ward has progressed it from being an outlying community separated from the city geographically. Development of the rural parts of Halswell continues with Milns Park, Riverstone, The Fields, Quaifes Park and Cloverdon some of the latest developments.

The Halswell Ward is well served for greenspace from the 60.4 hectare Halswell Quarry through to numerous neighbourhood parks that have been created as a part of property development contributions. A considerable number of the greenspaces contain water with lakes, drainage swales and creeks curving through them. Halswell Domain is a popular park used extensively by a large variety of sporting and recreational groups. Te Hāpua: Halswell Centre adjoins the domain with an outdoor swimming pool, library and community facilities.

The Southern Motorway cuts through the middle of the ward, dividing the wider Wigram and Halswell areas. This means there are essentially two hubs within the ward – that around the Halswell shopping area and Te Hāpua: Halswell Centre, and the other falling within the Wigram Skies development area.

Profiles compiled by the Community Support and Partnerships Unit

Facts and figures

Demographic Summary (2018 Census Data)

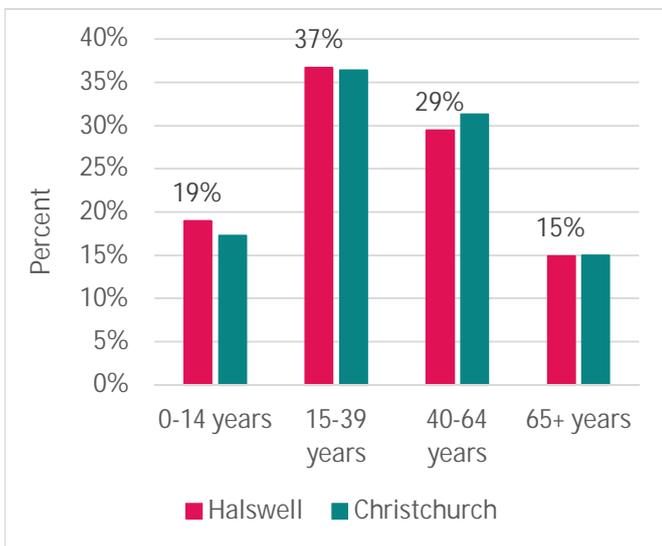

Population

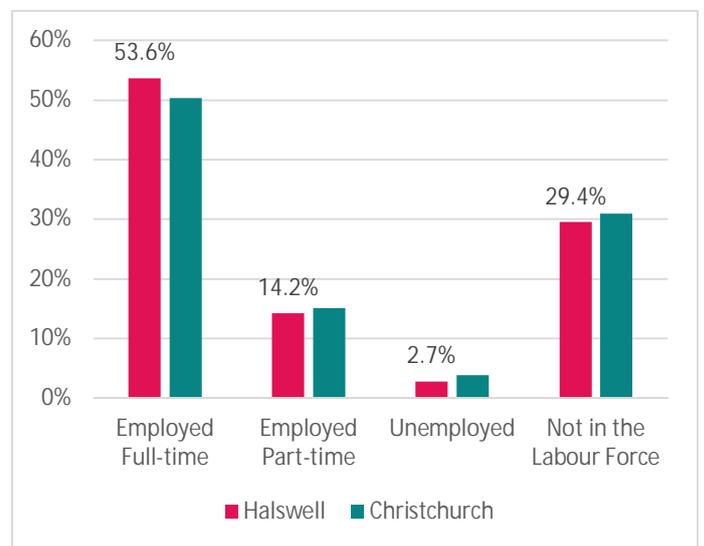

The population within the Halswell Ward boundary is: 23,847

Number of Occupied Private Dwellings: 8,268

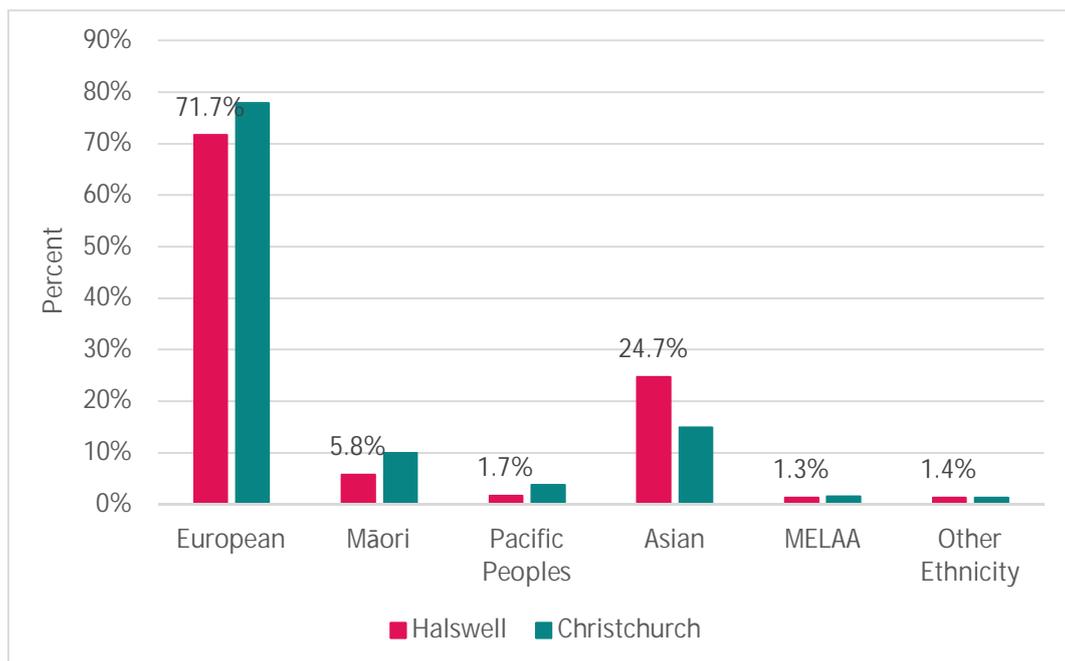

AGE

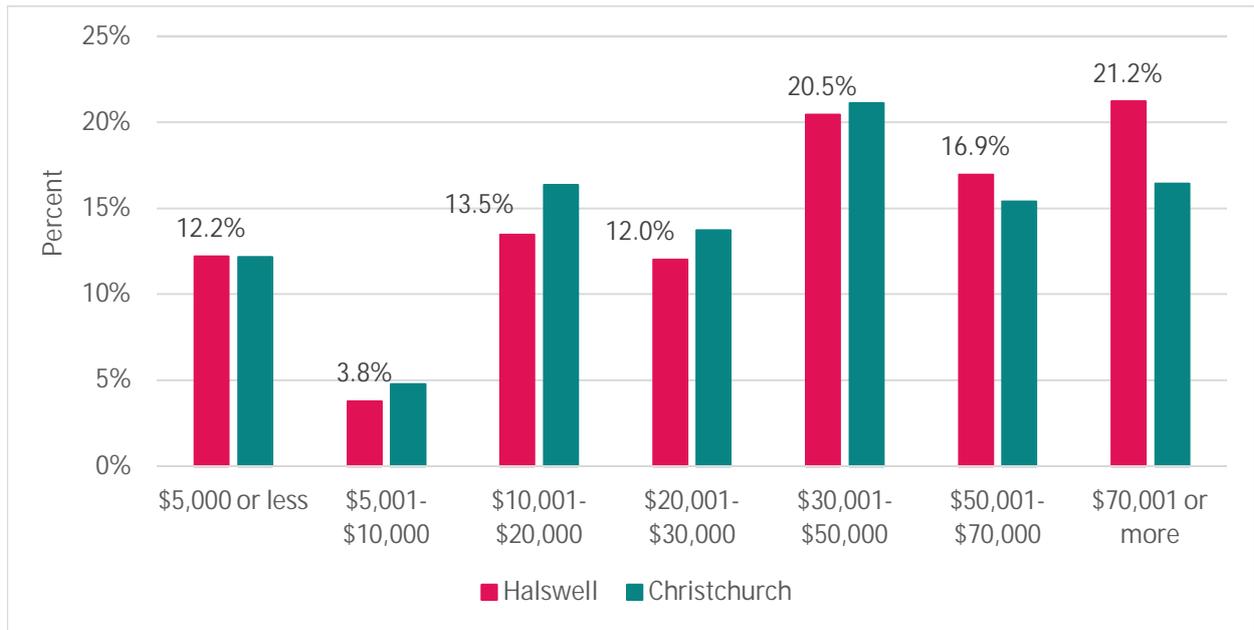

WORK AND LABOURFORCE STATUS

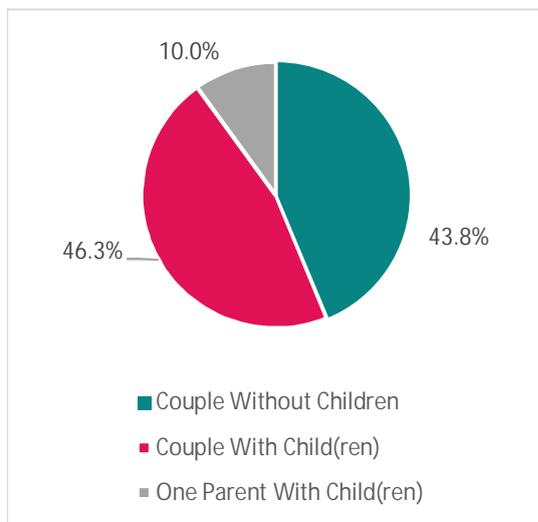

ETHNICITY

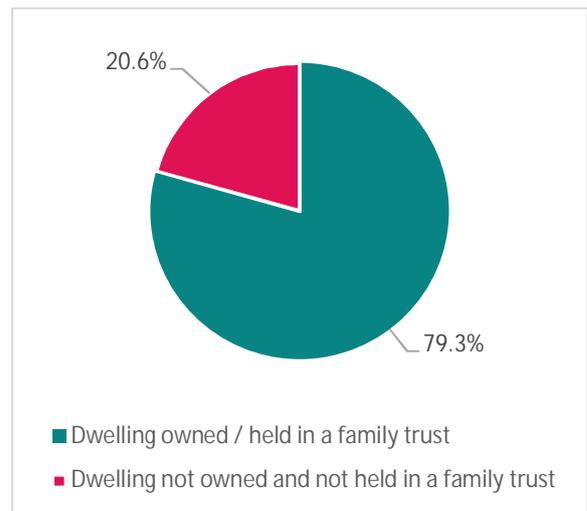

PERSONAL INCOME

FAMILY TYPE

TENURE OF HOUSEHOLDS

Facilities and Amenities

- 1 Council library and service centre: Halswell (Te Hāpua: Halswell Centre)
- 1 Council owned social housing complex with 15 units
- 2 shopping centres: Halswell and The Landing
- 7 Schools: 5 primary, 1 composite year 1-10, 1 special
- 15 early learning centres
- 4 medical centres and 2 aged care facilities
- Approximately 2,334 businesses employing 9,260 people (Feb 2021)
- 180 greenspace reserves including, Halswell Domain, Te Hāpua Halswell Summer Pool, Ngā Puna Wai Sports Hub.
- Multiple major Sport and Recreation amenities: Halswell Quarry and Canterbury Park and Carrs Road Reserve.

Socio-economic Deprivation

The aim of the NZ deprivation index research programme is to develop indexes of socioeconomic deprivation for New Zealand, to support and inform:

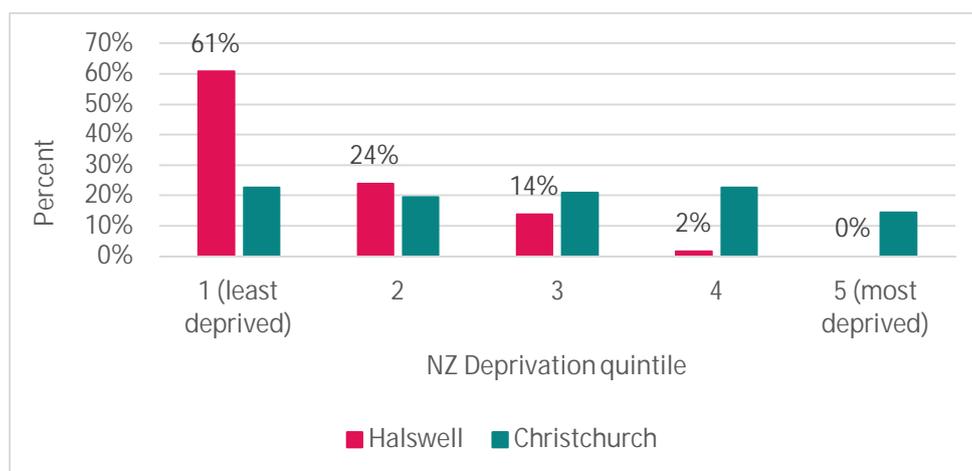

- Application in funding formulas
- Research in especially health and other social services. For example, in the health sector, many researchers use the indexes to describe the relationship between socioeconomic deprivation and health outcomes
- Community groups and community-based service providers to describe the populations they serve, and to advocate for extra resources for community-based services.

The nine variables included in the 2018 deprivation index are as follows:

- People aged 18-64 receiving a means tested benefit
- People living in households with equivalised income below an income threshold
- People with no access to the Internet at home
- People aged 18-64 without any qualifications
- People aged <65 living in a single parent family
- People not living in own home
- People living in household with equivalised bedroom occupancy threshold
- People aged 18-64 unemployed
- People living in dwellings that are always damp and/or always have mould greater than A4 size.

The scale of deprivation ranges from 1 to 10: 1 represents the areas with the least deprived scores. 10 represents the areas with the most deprived scores.

- Relative to the rest of Christchurch City, Halswell ward had lower levels of deprivation overall.
- Halswell ward did not have any areas classed as 'most deprived' (i.e. deciles 9 and 10, or quintile 5). For Christchurch City, 14 per cent of the population lived in areas classed as 'most deprived'.
- Around 61 per cent of this ward's population lived in the 'least deprived' areas (i.e. deciles 1 and 2), compared with 23 per cent of all of Christchurch City's population.

(Massey University)

Halswell Ward Deprivation Map

The Halswell Ward area is one of the more affluent areas in the city. Over half of the ward (61 percent) live within areas considered to be the least deprived (a rating of 1 to 2 on the social deprivation index). It is the only metropolitan ward with no parts of the ward that are within areas that are considered to be the 'most deprived' (a rating of 9 to 10 on the social deprivation index). Only 2 percent of people living in the ward live in areas with a deprivation rating of seven or over, compared with 34.9 percent within the whole of the Waipuna Halswell-Hornby-Riccarton Community Board area.

There is 21.2 percent of the ward aged over 15 years of age who have a personal income of over \$70,000. 76.8 percent of people in the ward area are with in part time or full time employment.

Approximately 67 percent of homes in the Halswell Ward are either owned or held in a Family Trust (compared with 63.5 percent citywide).

Community Infrastructure

Three of the six organisations providing community development and support to the Halswell Ward work specifically with the disability sector. St John of God Hauora Trust and Kilmarnock Enterprises provides support to people with intellectual disabilities. The Halswell Community Project facilitates vital networks between organisations in the area as well as connecting people to appropriate providers.

There are a large number of organisations offering recreational and sporting activities to the community from large scale sporting organisations through to smaller leisure and recreational activities. A good proportion of these operate within the Halswell area rather than in the Wigram area. This reflects a deficit in community-based infrastructure in that growing area. There is also no residents group covering the Wigram area. However, the Halswell area is covered by two residents groups.

There is one Council-owned and managed community facility – Te Hāpua: Halswell Centre in Halswell Road adjoining Halswell Domain. This facility is well used by community members who are visiting the Halswell Library, Halswell Outdoor Swimming Pool or the Council's customer service desk which are also part of Te Hāpua: Halswell Centre. The Council also own and manage in partnership with Sport Canterbury, Ngā Puna Wai Sports Centre from which a number of regional sporting groups are based. Athletics, tennis, Rugby League and hockey all have specialised surfaces at this complex.

Olympia Gymsports, Zhu Badminton Centre and the Christchurch Kart Club also have specialist facilities in the ward.

Community Outcomes

The Community Outcomes have been developed as part of the Council's Strategic Framework, which provides a big picture view of what the Council is trying to achieve for the community.

The Community Outcomes describe what we aim to achieve for Christchurch. They are:

- Resilient communities
- Liveable city
- Healthy environment
- Prosperous economy

You can view the Council's Strategic Framework and read more about the Community Outcomes here: <https://ccc.govt.nz/the-council/how-the-council-works/20182028-vision/strategic-framework>

The narrative below provides an overview of the area in relation to each of the outcomes.

Resilient Communities

Within the Halswell suburban area of the Halswell Ward there are a wide range of community programmes and activities available to local communities. However, there are considerably less within the Wigram part of the ward.

The Halswell Community Project is a key leader in the provision of community services and programmes, either as a facilitating organisation or supporting other organisations. The organisation authors the Halswell website, newsletter and Facebook pages which have wide coverage and are key connecting agents within the local community. It also facilitates monthly network meetings and workshops for the local community. This provides representatives of local community organisations the opportunity to share ideas and hear about current community issues and activities. The Halswell Community Project have recently began working in the youth space, contracting a Youth Worker to begin working in the local schools to understand the needs of young people in Halswell.

The Halswell Hub, created in the former Halswell library building, also connects members of the local community as a drop in center and a bumping space

The Halswell Menzshed operates six days a week and works collaboratively with a number of organisations, including St John of God on Nash Road where the 'shed' is based, and other disability support organisations. Through involvement in the Menzshed, participants gain a sense of belonging as well as the satisfaction of knowing that they have created something meaningful for others.

The Halswell Hall on Halswell Road is a community owned and managed facility, independent of the Council. It has been a well-regarded mainstay in the Halswell community for nearly a century, hosting many Halswell residents' important family functions and events. It is also used on a regular basis by a number of Halswell based groups.

The Halswell Residents Association and Kennedys Bush Road Neighbourhood Association are particularly active advocates for residents within their catchment areas. A number of local residents in the ward will take the opportunity to come and speak to the Community Board if they have issues that affect their lives. However, it is also noted there is plenty of room for improvement in terms of making people aware of how they can participate in local decision-making and be provided with the encouragement and support to do so.

The Wigram part of the ward does not have a residents group nor a key organisation based in the area offering core community development and/or support functions.

Within the ward there are also three key organisations providing services for people with disabilities. Kilmarnock Enterprises is based in the Wigram industrial area and provides employment for over 65 people with disabilities utilising a social enterprise model. St John of God Halswell, operated by the St John of God Hauora Trust, is a 60 room specialist service providing residential and respite support to people aged 16 to 65 living with physical or neurological disabilities. Halswell Residential College is a specialist residential school with a roll of 17 students (aged 7 to 17 years). These students need significant programme adaptation as their educational, social and emotional needs cannot be met in their local environment.

Te Hāpua: Halswell Centre is one of Council's most well-utilised community facilities used by a wide range of regular users as well as casual hirers. With a library, customer service desk and outdoor swimming pool in the complex, it becomes an essential hub within the community for a wide range of ages.

While there are nine schools located in the ward, there is no state secondary school. Rangatahi living in the ward attend a number of secondary schools within the city and in the Selwyn area. The lack of a commonly attended school base affords additional challenges for those working within the youth sector to achieve connectivity and identity amongst young people. Three of the city's newest schools are located in the ward (Wigram Skies, Knights Stream and Seven Oaks).

Liveable City

The Halswell Ward is located on the outskirts of the city boundary with Selwyn District Council. Two State Highways cut through the ward. The Southern Motorway (State Highway 76) connects Brougham Street to State Highway 1 and effectively cuts the ward in two, with only three crossing points within the two parts of the ward.

The ward falls into the catchment area of the South West Area Plan, adopted by the Council in April 2009. South-West Christchurch was identified in both the Greater Christchurch Urban Development Strategy and the then Christchurch City Plan as a major urban growth area. The Area Plan became an implementation method for both of those documents, although the 2010/11 earthquake events changed much of the city planning priorities and accelerated the projected urban growth in this area.

One of the three guiding principles of the South West Area Plan is Liveability, which is achieved through recognising and providing for the needs of the diverse and constantly changing community.

The Halswell Ward is well provided for in terms of greenspace. There are 180 different reserves in the ward totalling approx. 525 h², meaning 158.9 m² per person. This figure excludes the major regional parks that are also located within the ward. Of the 180 greenspaces there are 43 parks with playground equipment, seven parks with basketball half courts, eight tennis courts, two skate parks, two petanque courts and two with fitness equipment.

Notable reserves in the ward include Ngā Puna Wai, Halswell Domain and Halswell Quarry. Halswell Domain in particular is well used by the local community with a number of sporting and recreational organisations based there. The Christchurch Model Engineers are also based at Halswell Domain with a purpose built model railway track. Halswell Quarry is home to three heritage buildings and the city's Sister City commemoration gardens.

In addition to providing sporting facilities for a number of different codes, Ngā Puna Wai Sports complex also offers passive recreation opportunities and is a host to many major sporting events. The new Netsal facility is currently being built on the site and is expected to

Four shopping precincts are located in the ward. The Landing in Wigram Skies, two on Halswell Road, at Nicholls Road corner and Halswell Junction Road corner, and in Longhurst on Hammill Avenue. There are also a number of boutique businesses run from private homes.

In terms of housing, Halswell Ward has a higher proportion of modern homes reflecting the recent and ongoing property developments.

Healthy Environment

Environmental sustainability is not only a guiding principal for the South West Area Plan, but also the foundation of it. A strong emphasis is placed on ensuring the Upper Heathcote River/Ōpawaho and Halswell River/Hurutini catchments have the capacity to absorb further urban development without creating significant downstream effects on natural resources, people and priorities.

The Heathcote River/Ōpawaho originates from springs in the Wigram area. A number of drains and waterways feed into it, the more significant being Cashmere Stream and Haytons Drain. The Halswell River/Hurutini originates from springs scattered around the areas of Halswell, Templeton and Prebbleton that flow into Knights Stream and Nottingham Stream as well as some rural drains.

Improving the water quality and managing flooding are central to the sustainable management of the Heathcote and Halswell River catchments. Much of the aquifer providing Christchurch's drinking water supply flows under the South West area although some areas are more vulnerable to contamination where the ground water is near the surface and not as confined. Eleven objectives are outlined in the Plan to provide a high quality naturalised water environment. A well designed, maintained stormwater network will replicate the natural environment, protect and improve water quality and quantity, manage flood risk, and maintain and improve natural habitats.

A further goal is to establish a variety of indigenous forest and wetland habitats, connected by ecological corridors. Establishing a connected network of habitats has proved to be initially effective through incorporating existing remnant habitats located on the species migration routes which move through Halswell.

Residents in the Awatea area have long been concerned about the environmental effects of the Owaka Pit in Owaka Road and the compliance of its operators to Resource Management Consent conditions. The property is approximately 9 hectares in size, the majority of which was used as a municipal landfill after the end of the shingle extraction. Following the earthquakes, waste material from demolitions was being dumped there including medium density fibreboard (MDF). Issues are with dust and seepage into water supplies.

Prosperous Economy

As at February 2021, the Halswell Ward had approximately 2,334 businesses employing 9,260 people. The top six industry types in the ward are;

1. Rental, Hiring and Real Estate Services
2. Construction
3. Professional, Scientific and Technical Services
4. Wholesale Trade
5. Financial and Insurance services
6. Manufacturing

According to the 2018 Census data, 14 percent of people in the Halswell Ward are self-employed or work in a business that they own. This is slightly higher than the city wide figure of 12 percent.

There are 22 percent of people in the Halswell Ward who receive income from interest, dividends, rent or other investments which again is higher than the city wide figure of 18 percent.

In addition, 21.2 percent of people in the Halswell Ward have a personal income of over \$70,000 which is higher than the city wide figure of 16.5 percent.

The differences in house values within the Halswell Ward can be evidenced in the November 2021 median house values for the different suburbs as follows: (sourced from Opes NZ report on house values based on the Core Logic House Price Index). The figure in brackets is the value at December 2020.

- Kennedy's Bush: \$1,460,000 (\$1,152,450)
- Westmorland: \$1,039,600 (\$773,650)
- Wigram: \$833,900 (\$622,850)
- Halswell: \$789,800 (\$588,100)

All of these are higher than the Canterbury median house price of \$680,000.

Current Community Issues

| Issue | Progress to date / outcomes |
|---|--|
| <p>Local road network improvements in Halswell</p> <p>Residents in the Halswell Ward have indicated a number of road network trouble spots with the Community Board and have requested that the board influences where it can, to find solutions to these issues. Examples include, but are not limited to, Lodestar Avenue, Dunbars Road and Aidanfield Drive. Additionally, residents in Westmorland have asked for better connections to their surrounding areas by means other than by car.</p> | <p><u>February 2021</u></p> <p><i>This is a priority area under the 2019-22 Waipuna Halswell-Hornby-Riccarton Community Board priorities for the Halswell Ward.</i></p> <p>The first Community Safety meeting is planned for March 2021 in the Knights Stream area. This is the opportunity for traffic safety concerns to be aired and solutions worked through by the community.</p> <p><u>February 2022</u></p> <p>Wigram Skies Speed Review conducted with the Council accepting Board recommendation of reducing the speed limits in Wigram Skies.
