

Environment Canterbury Odour and Dust Report May 2021 – July 2021

(Prepared for the Community Liaison Group meeting 17th August 2021)

Bromley Reporting Area

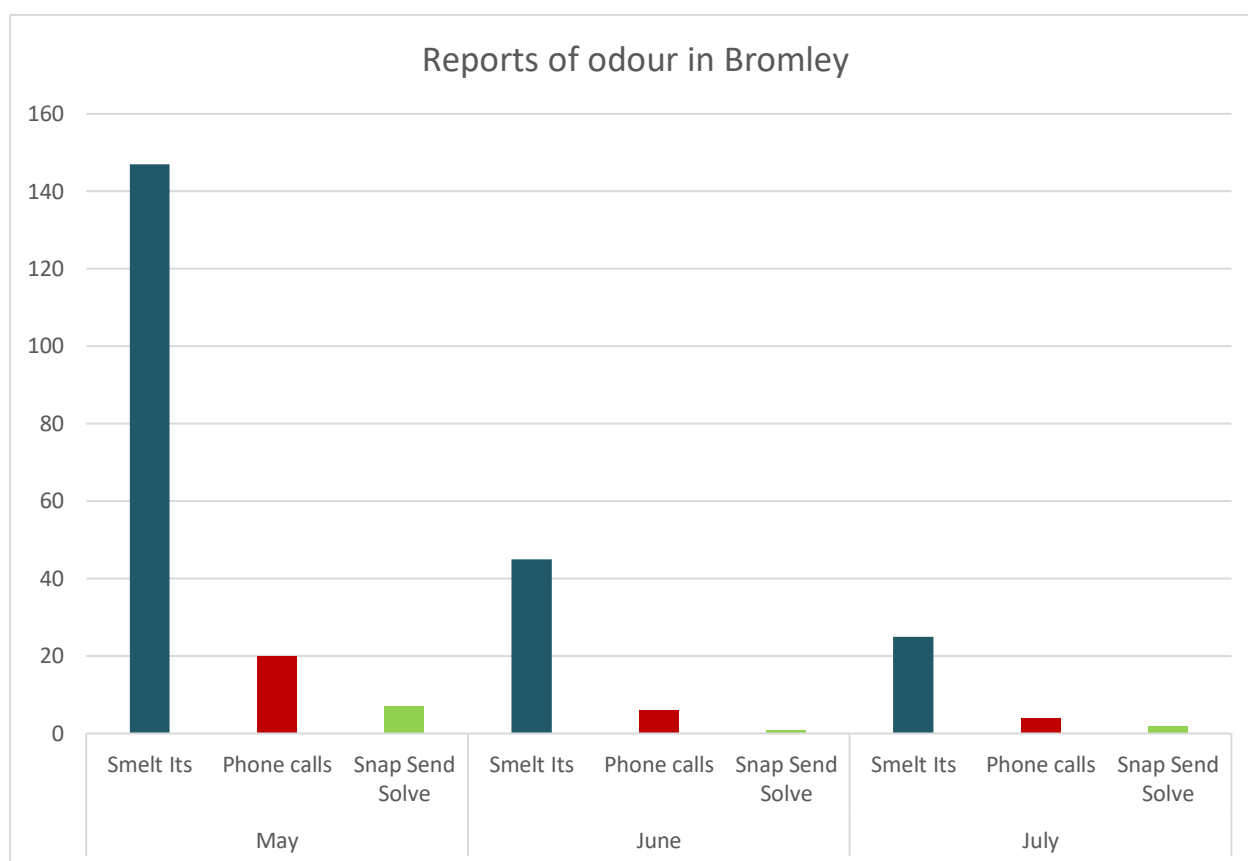

The data used in this report relates to incidents received within the Bromley pilot area, as outlined by the purple area in the map below. For consistency of reporting, only Smelt Its within the purple boundary are considered, with the exception being circumstances where officers substantiated odour from Bromley outside of the specified area.

Odour

A total of 94 incidents were logged with Environment Canterbury during the reporting period for Bromley. A large proportion of incidents are now reported using Smelt It. As Smelt It does not ask the submitter where the odour is coming from, Smelt Its are not “assigned” to a business. However, an odour from Living Earth may be attributed to it.

Note: There may be multiple Smelt Its assigned to one incident.

Of the 94 incidents, there were 66 incidents where the customer specifically referenced Living Earth Limited. 36 assessments were carried out by warranted officers during this time in Bromley. Of those 36 assessments, our officers confirmed odour from Living Earth on 21 occasions.

The below table shows the results of the assessments where we confirmed odour from Living Earth that was considered offensive and objectionable beyond the property boundary.

	May 2021	June 2021	July 2021
Living Earth	10 NONCs	4 NONCs	1 NONC
Other sites	0	0	0

NONC – Notice of Non-Compliance A warranted officer confirmed the source of the odour and that it was offensive and objectionable beyond the boundary of the site, by completing an odour assessment (including a 360 appraisal) at the site or site boundary in accordance with Ministry for the Environment guidelines.

Dust

Reports of Dust in the Bromley Area:

During this reporting period, we did not receive any reports of dust in the Bromley area.
