

Land Drainage Recovery Programme

Reducing the risk of flooding throughout Christchurch City

Dudley Creek Work Notice

10 March 2017

Road Closures in Richmond

Dudley Creek Project

The Stapletons Road route for Dudley Creek flood remediation was approved unanimously by Councillors on 12 August 2015. When the programme of work is completed, there will be a reduction in the risk of flooding in the Flockton area - benefitting at least 585 properties.

Stage one running from Slater Street to Chancellor Street and along Julius Terrace is complete and work is now underway at various points on Stapletons Road. The bypass section of the scheme is progressing on Medway, Petrie and Randall Street, **see Map One overleaf**.

Road Closures

Currently there are many closures in place, and additional closures planned in the coming months.

- Partial or full road closures are necessary when we cannot safely keep one or two traffic lanes past the work site.
- Some of the roads we are working on are narrow, and a road lane must be a minimum of 3 metres wide. Due to the extent of work that we are completing, there is not enough space to keep the road open.
- Downer works with Christchurch City Council and Christchurch Transport Operations Centre (CTOC) when we are planning our work. CTOC ensure that there aren't too many road closures in one area, at the same time.

Further information

- Any nearby residents will be provided with at least 5 days notice of any full or partial road closures including how long the closure is to be in place.
- There may be increased vehicle movements as trucks and vehicles will use different access routes to get around the worksites.

- There will be traffic management signage on the streets near to a road closure. It is important to take note of these signs and any suggested detour routes.
