

Christchurch City Council
Innes Ward
Electing 1 Councillor

Pauline COTTER

The People's Choice

My principal place of residence is in the Innes Ward area.

Resident of St Albans for 32 years, City Councillor since 2013, I currently Chair the Infrastructure Transport and Environment Committee, Council appointment to the Christchurch West Melton

Water Zone Committee.

Protecting our pure Christchurch groundwater is paramount, both Quality and Quantity. Council must educate to help prevent continual contamination of our urban waterways, and encourage land use diversification to halt nitrate pollution of our drinking water.

I am a strong advocate for the Edgeware Pool Project, speedy completion of the St Albans Community centre, a new centre at 10 Shirley Rd. I am passionate about our Community centres, the upkeep of our parks and reserves, neighbourhood community gardens, all of which create connections between us.

Council must show leadership with Climate Change. Transport choices for all modes, focus on Public Transport infrastructure, rapid transport corridors, move people not cars, embrace technology, move Christchurch to a clean, green, active, healthy city.
