  - ii. in the case of interior heritage fabric, ~~it is specifically the extent of protection is~~ identified in the schedule; unless

- iii. the physical condition of the **heritage item**, and any **restoration, reconstruction, maintenance, repair** or upgrade work would result in the **heritage values** and integrity of the **heritage item** being compromised to the extent that it would no longer retain its heritage significance; and/or
- iv. there are engineering and financial factors related to the physical condition of the **heritage item** that would make it unreasonable or inappropriate to schedule the **heritage item**.

#### 9.3.2.2.2 Policy – Identification, assessment and scheduling of heritage areas

  - vi. new buildings in heritage settings. Subdivision and new development which maintains or enhances access to heritage items, defining buildings and contributory buildings.

#### 9.3.2.2.6 Policy - Relocation of heritage items within and beyond heritage settings

- a. Provide for the ~~relocation of a heritage item~~ of a heritage item within its heritage setting scheduled in Appendix 9.3.7.2, where the relocation will maintain the heritage significance of the heritage item.
- b. Protect a heritage item from relocation beyond its heritage setting, except:
  - i. when alternatives which retain the item within its heritage setting have been explored, and relocation is demonstrated to be the only reasonable option to provide for the retention and ongoing viable use, including adaptive re-use of the heritage item and maintaining heritage significance; and
  - ii. where the location provides a setting compatible with the item's heritage value.

#### 9.3.2.2.8 Policy - Demolition of ~~scheduled historic heritage~~ ~~of heritage items~~

- a. When considering the appropriateness of the demolition of a heritage item scheduled in Appendix 9.3.7.2 or a defining building or contributory building in a heritage area scheduled in Appendix 9.3.7.3, have regard to the following matters:
  - i. whether there is a threat to life and/or property for which interim protection measures would not remove that threat;
  - ii. whether the extent of the work required to retain and/or repair the heritage item or building is of such a scale that the heritage values and integrity of the heritage item or building would be significantly compromised, and the heritage item would no longer meet the criteria for scheduling in Policy 9.3.2.2.1.
  - iii. whether the costs to retain the heritage item or building (particularly as a result of damage) would be unreasonable;
  - iv. the ability to retain the overall heritage values and significance of the heritage item or building through a reduced degree of demolition; and
  - v. the level of significance of the heritage item.

### 9.3.3 How to interpret and apply the rules

- a. These rules apply to heritage items and heritage settings scheduled in Appendix 9.3.7.2 - Schedule of Significant Historic Heritage as Highly Significant (~~Group 1~~) and Significant (~~Group 2~~), and heritage areas.
- b. The planning maps identify sites that contain a heritage item and heritage setting, and heritage areas. Reference should also be made to:
  - i. Appendix 9.3.7.2 - Schedule of Significant Historic Heritage Items which includes links to the Statement of Significance, Heritage Aerial Map and Planning Map for each heritage item;
  - ii. Appendix 9.3.7.3 – Schedule of Heritage Areas, which includes links to the Heritage Area Report and Site Record Forms, Heritage Area Aerial Map, Heritage Area Site Contributions Map, and Heritage Area Interface Sites and Character Area Overlap Map for each heritage area;
  - iii. ~~Appendix 9.3.7.7 – The Heritage Aerial Maps.~~ Appendix 9.3.7.4 – Heritage item and heritage setting exemptions from zone rules;
  - iv. Appendix 9.3.7.5 – Heritage Works Plan;
  - v. Appendix 9.3.7.6 - Certificate of Non-Heritage Fabric.

- c. Appendix 9.3.7.2 - Schedule of Significant Historic Heritage Items contains the **heritage item(s)** which have met the significance **threshold criteria** in Policy 9.3.2.2.1 and their associated **heritage setting**. Where the **heritage item** is an area of open space, this is stated in the schedule in Appendix 9.3.7.2. Where the interior of a **heritage item** is specifically scheduled this is stated in Appendix 9.3.7.2, with the specific interior **heritage fabric** protected for that **heritage item** described in the Register of Interior Heritage Fabric which is a document incorporated by reference in this District Plan. **Heritage settings** do not have a status in the Plan which is independent of the **heritage item**. Some open spaces have met the criteria to be heritage items in their own right and may also contain other heritage items and heritage settings, or other structures and features which are not separately scheduled. Where scheduled heritage items are located together and have related heritage values they are grouped together as a “place” with a collective name in the schedule in Appendix 9.3.7.2.
- d. Scheduled Interiors – Where interior heritage fabric of a **heritage item** is protected by the rules in Chapter 9.3 this is shown in the Scheduled Interior column in Appendix 9.3.7.2.
- e. The Heritage Statement of Significance for each scheduled item and the Residential Heritage Area Record Form and Site Record Forms for each heritage area can be accessed from a link in the Group-schedules in Appendix 9.3.7.2 and Appendix 9.3.7.3. Statements of Significance and Residential Heritage Area Record Forms do not form part of the Plan, and are simply a ready reference tool for recording information known to the Council that supported scheduling under Policy 9.3.2.2.1 and Policy 9.3.2.2.2. Statements of Significance and Residential Heritage Area Record Forms may be updated by the Council from time to time if further information becomes available.
- f. ~~d.~~ The Heritage Aerial Maps – Heritage Items and Heritage Settings can be accessed via Appendix 9.3.7.2 by clicking the link in the Heritage Aerial Map Number column next to the for the relevant heritage item in the schedule. The Heritage Aerial Maps show an outline of each **heritage item** and **heritage setting**. The **heritage item** outline (solid black line) shows the extent of the roofline and the footprint of the parts or whole of the features contained within the **heritage item**. The Heritage Aerial Maps also show the extent of the associated **heritage setting** (dotted white line), associated with **heritage items**. **Heritage settings** often, which do but not always, follow cadastral boundaries. Some open spaces contain multiple individual **heritage items** and settings and have status as a **heritage item** in their own right. Where scheduled **heritage items** are located together and have related heritage values they are grouped with a collective name in Appendix 9.3.7.2 – Schedule of Significant Historic Heritage.
- g. ~~e.~~ The rules that apply to **heritage items** and **heritage settings** scheduled in Appendix 9.3.7.2 and **heritage areas** scheduled in Appendix 9.3.7.3 are contained in the activity status tables (including activity specific standards) in Rules 9.3.4.1.1 to 9.3.4.1.6. **These rules do not apply to Akaroa Township Heritage Area (HA1). The matters of discretion for the Akaroa Township Heritage Area in Rule 9.3.6.3 apply when a rule in the Plan is breached.**
- h. ~~f.~~ Activities within **heritage items**, **heritage settings** and **heritage areas** scheduled in Appendix 9.3.7.2 and 9.3.7.3 are also subject to the:
- i. rules contained in other sub-chapters of Chapter 9 Natural and Cultural Heritage;
  - ii. rules in the relevant zone chapters; and

  - i. ~~the heritage item is retained in situ; or~~
  - ii. ~~resource consent has been granted for relocation of the heritage item within its heritage setting.~~
- j. ~~h.~~ For signage in or on heritage items and in heritage settings scheduled in Appendix 9.3.7.2 the rules and Matters of Discretion in Chapter 6.8 apply, as well as those in ~~and Chapter 9.3~~ apply, except as expressly stated under ~~Rule 9.3.4.1.1 P6 and Rule 9.3.4.1.3 RD7.~~

  - i. The rules in Chapter 11 that relate to heritage items shall not apply to the Hagley Park heritage item (1395), other than to heritage items and heritage settings individually scheduled in the Schedule of Significant Historic Heritage in Appendix 9.3.7.2.
- n. ~~m.~~ The following exemptions apply in relation to Rule 9.3.4.1 - Activity Status Tables:

- i. For the Annandale ~~Woodshed~~ ~~Woolshed~~ heritage setting (12 Starvation Gully Road, ~~Heritage Setting Number 535~~), Rule 9.3.4.1.3 RD1 and RD2 shall not apply to the modification of, or new stockyards within, the heritage setting shown on Heritage Aerial Map 476.

A copy of the relevant HSOS can be accessed via the electronic plan through a link from the group column in Appendix 9.3.7.2 – Schedule of Significant Historic Heritage or a hard copy can be requested from the Council. The HSOS does not form part of the plan, and is simply a ready reference tool recording information known to the Council that supported the RMA s32 evaluation for the Chapter. The HSOS may be updated by the Council from time to time, if further information becomes available.~~

## 15.15 Appendices

### Appendix 15.15.7 Design guidelines – Akaroa Commercial Banks Peninsula Zone

#### Proposed text

##### a. Introduction

- i. The illustrations used in the guidelines are provided to assist in understanding the points expressed in the text. These are not all existing **buildings** but are stylised designs. These guidelines have been prepared to help you if you are thinking of **building** in the Commercial Banks Peninsula zone at Akaroa. They are intended to help you achieve the **building** you want, while at the same time ensuring that new **buildings** fit in with the town's surviving historic **buildings** and maintaining or enhancing the town's present character.

- ii. Figure 1: Typical Akaroa streetscape
- iii. You will find in this document a brief discussion of Akaroa's architectural history, and more importantly, a description of its architecture and value as a well preserved small scale historic town with a range of architectural styles. The historical and architectural importance of the town has been recognised by the local community, Heritage New Zealand Pouhere Taonga and the **Council**. The guidelines outline the key principles which the **Council** will take into account in considering any consent applications.
- iv. This document will elaborate on those principles, which can, in essence, be summarised as follows:

A. New development and additions to existing structures should:

- I. Recognise and respect the unique historic character of Akaroa.
- II. Relate well to surrounding **buildings** and the general environment.
- III. Avoid dominating neighbouring **buildings**.
- IV. Respect important views from public places.

b. Why guidelines?

- i. Akaroa has a distinctive visual character, based on its physical setting, its **buildings** and its open spaces and gardens. A large part of the centre of Akaroa has been recognised by Heritage New Zealand Pouhere Taonga and **registered listed** as a Historic Area. The **Council** has similarly recognised that this special character is worth protecting by including in its **District Plan**, provisions, which allow for consideration of the effects of proposed new **buildings** and alterations to existing **buildings**.
- ii. The **Council**'s aim, through these guidelines, is to ensure that the special historical character of Akaroa is maintained, as development of the town proceeds. In endeavouring to meet that objective, the other main goals are to provide property owners and developers with design and appearance guidance and to encourage early discussion of proposed **building** plans with the **Council**.
- iii. The primary concern of these guidelines is to protect, for cultural and aesthetic reasons, the attractive appearance of the town after more than 150 years of growth and change. Adherence to these guidelines also promises economic advantage for the town. Akaroa's appealing appearance and atmosphere help make it a desirable place to live, and an attractive place to visit. The town's architectural and historical heritage contributes greatly to its appeal as a holiday destination. By helping to protect the intrinsic characteristics of the town, the guidelines will assist in strengthening the town's major economic base and potentially enhance the value of your property.
- iv. New **buildings**, or significant alterations to existing **buildings** in the Commercial Banks Peninsula Zone are the main concern of these guidelines. However, many of the principles and specific guidelines could also be applied to the town's advantage in the residential areas which surround the Commercial Banks Peninsula Zone.

c. The Planning Framework

- i. The **Council** can consider the design and appearance of proposed work in Commercial Banks Peninsula Zone through the resource consent process. Any **building** work in the Commercial Banks Peninsula Zone should meet the standards of the **District Plan** and have regard to these design guidelines.
- ii. The relevant section of the **District Plan** is Chapter 15 for the Commercial Banks Peninsula Zone.

- iii. These guidelines set out issues which the Council will take into account when assessing a resource consent application required for design and appearance reasons. The guidelines are intended to help applicants who require resource consents to undertake building work in the Commercial Banks Peninsula Zone understand how the Council will evaluate the design and appearance aspects of proposed work.
  - iv. The Commercial Banks Peninsula Zone lies within the Akaroa Heritage Historic Area scheduled in the District Plan and the Akaroa Historic Area listed registered by Heritage New Zealand Pouhere Taonga. This area has been recognised nationally as having a high percentage of original historic buildings which are of aesthetic and architectural importance in their own right, and form an inter-related group of historic places. As such the area is a vital part of the historical and cultural heritage of New Zealand. Consultation with Council's Urban Design and Heritage teams, Approval from the Heritage New Zealand Pouhere Taonga, and the Akaroa Design and Appearance Committee may be appropriate is needed for work on any building within the Heritage/Historic Area, or on any building elsewhere in the town which has been individually scheduled in the District Plan or registered listed by the Trust Heritage New Zealand Pouhere Taonga.
  - v. In considering the design and appearance aspects of proposed building work in the Commercial Banks Peninsula Zone, the Council planners may take advice from Council's Urban Design and Heritage teams, and Heritage New Zealand Pouhere Taonga or any qualified expert. Individuals who need resource consent for building work in these areas are urged to study these guidelines and to discuss their plans with the District Council and/or a professional consultant, the Akaroa Design and Appearance Advisory Committee and Heritage New Zealand Pouhere Taonga before formally applying for resource consent for the work. Early consultation with Council can often facilitate subsequent consent processes, resulting in reduced time delays and costs.
- d. Akaroa's architectural history
- i. Akaroa has a distinctive architectural quality that stems, in part, from the high number of colonial buildings that have been retained to this day. Akaroa is one of New Zealand's most charming and romantic towns, although its origins as a French settlement are not strongly reflected in much of its architecture today. The earliest buildings of the French had steeply pitched roofs, small dormers, casement windows divided into many panes, louvered shutters and symmetrical facades. As early as the mid-1850s, Akaroa's buildings were no longer markedly different from other New Zealand buildings. A great number were cottages with reasonably large dormers, verandas and lean-to's. Almost all were built of horizontal weatherboards with steep roofs initially of shingles, then of corrugated iron. These were typical New Zealand colonial buildings.
  - ii. The one and a half storey, gable ended cottage with veranda, lean-to and dormers is often idealised as the archetypal Akaroa building. Though these cottages are still abundant, and valued, the town's architectural traditions are much richer and more varied.
  - iii. Later building designs in the town also followed general New Zealand trends, with horizontal weatherboard and corrugated iron the predominant building materials. Thus, nineteenth century churches are variants of colonial wooden Gothic, while Italianate was favoured for public and commercial buildings. Many commercial premises were two-storied and differed from residences only in being somewhat larger, and in being built-up to the street line. All were still relatively small buildings and almost all were built of "timber and tin". This uniformity in styles and materials for residences and public and commercial buildings, and little variation in building size, have been characteristic of Akaroa's architecture since the nineteenth century.

iv. Figure 2: Examples of early colonial cottages

v. In the late twentieth century there was a new development in Akaroa's architectural history. A demand emerged for multi-unit, privately owned **apartments**. These were up to three storeys high, built up to or close to the street line, and often of masonry construction. These **buildings** marked a significant departure from the single family houses and cottages, standing in individual sections, which were previously characteristic of most of the town. In retrospect many of these structures, individually or collectively, have not been successful in maintaining the intimate, mostly small scale of the town and the use of complementary **building** materials.

vi. Figure 3: Townhouse block demonstrating overly repetitive elements. The **buildings** to the right display a pleasing variety and interest.

vii. Akaroa's diverse range of **buildings** of different sizes, shapes, styles, set-backs, roof forms and materials mean there is a very large architectural vocabulary on which architects can draw for new **building** design, without introducing styles, or details that would appear out of place. It is

important that new **buildings** and extensions reflect existing architectural themes and styles.

e. Akaroa's setting and urban form

- i. Preserving and enhancing what is appealing about Akaroa requires careful consideration of more than the design of individual **buildings**. The spaces between matter too. Gardens and trees are generously dispersed throughout the town and large open spaces separate different built-up areas. **Building** has mostly been concentrated on the foreshore and up three small valleys, with the intervening spurs remaining open or bush-covered. The close integration between the natural and urban worlds in Akaroa also results from the town's position facing onto an extensive harbour, and being ringed by grand hills. Applicants are encouraged to consider the impact of their design or **building** extension on the existing views of water and hills from the town and of the integration of the built and the natural environment.
- ii. The town's development, and the proximity of commercial premises and residences give the town the relaxed, convivial atmosphere of a village. The maintenance of public and **retail activities** at street level is important to sustaining the town's vitality and is protected in certain areas along Beach Road between Rue Jolie and Bruce Terrace. The maintenance of open spaces and of private gardens is also important to maintaining the town's atmosphere.

f. Diversity and innovation

- i. New designs will generally be acceptable if their proportions fit in well with nearby older **buildings** and maintain the scale of existing streetscapes. New **buildings** of contemporary design, built using up-to-date materials and **building** technologies can be added to Akaroa, provided they avoid or mitigate any adverse visual effects through careful use of scale, density, bulk, exterior cladding, external detailing and through their **site** location and **setback**.
- ii. Successful approaches are:
  - A. Compatible design: new **buildings**, or new work on old **buildings** may vary the design but maintain the proportions, scale, materials, textures and colours of the original.
  - B. New design: work of completely contemporary design which uses modern materials and **building** technologies, but shows respect for the character of existing old **buildings** in the area. Care must be taken that the historic character of the town is maintained when new designs are introduced.

- iii. Figure 4: Modern buildings incorporating key architectural themes such as steeply pitched gabled roofs, verandas and vertically oriented windows.
- iv. While nineteenth and early twentieth century buildings largely set the character of Akaroa, new development should generally reflect, rather than exactly replicate, these historic styles. Sympathetic design, whereby certain characteristics of historic buildings are incorporated into new buildings, is encouraged. Contemporary design, if carefully conceived to fit with the town's character, is often preferable to replica buildings.

- v. Figure 5: New residence demonstrating site specific sympathetic small scale forms and details, and vertical windows.

- g. Building on specific sites

- i. Each individual **site** has different **buildings adjoining** it, and sits in a different relationship to the wider landscape. What is suitable for one particular **site** may be quite unsuitable on another **site**. **Corner sites** need particular care, since they form a visual focal point. In some situations larger **buildings** on **corner sites** will be desirable to define streetscapes, on other **corner sites**, it may be desirable to avoid overpowering historic **buildings** nearby.

- ii. Figure 6: Corner Treatment- both **buildings** strongly define the corner yet include smaller scale forms that the pedestrian can relate to.
- iii. The size and scale of new **buildings** in relation to their neighbours are as important as the materials or architectural style of the new **building**.
- iv. The use of materials and architectural style of any development may add or detract from the overall proposal, its visual impact on the streetscape and historic character of the town.

#### h. Key concepts

- i. Streetscape, rhythm and scale

A. The goal is to maintain appealing streetscapes, characterised by sequences of **buildings** which are in scale and exhibit a pleasing modulation. Streetscape refers to the ways in which **buildings** form, together with gardens and trees, attractive combinations of mass and colour. **Buildings** are in harmony when, while not identical, they share similar elements and are of a compatible size and form. When a rhythm is discernible in a sequence of **buildings** there are no abrupt transitions, in size, form or architectural detail, from one **building** to the next.

- B. It may be appropriate for a contemporary building to sit beside a traditional weatherboard one provided there is some relationship to the rhythm and scale of **windows**, doors, roof pitch and other design elements.

- C. Figure 7: **Height** and rhythm- a pleasing relationship between **height** and rhythm is evident.
- D. The goal is to maintain appealing streetscapes, characterised by sequences of **buildings** which are in scale and exhibit a pleasing modulation. Streetscape refers to the ways in which **buildings** form, together with gardens and trees, attractive combinations of mass and colour. **Buildings** are in harmony when, while not identical, they share similar elements and are of compatible size and form. When a rhythm is discernible in a sequence of **buildings** there are no abrupt transitions, in size, form or architectural detail, from one **building** to the next.
- E. It may be appropriate for a contemporary building to sit beside a traditional weatherboard one provided there is some relationship to the rhythm and scale of **windows**, doors, roof pitch and other design elements.

- F. Figure 8: Scale- an out of scale **building** which dominates adjacent **buildings** by size, bulk and **height**.
- G. Larger, bulkier **buildings** can reflect the smaller scale of surrounding buildings by repetition of design elements such as gables, steps in the plan of the **building**, the use of different roof shapes, or dividing the **building** into visually separate units by using different treatments or colours for cladding.
- H. Generally, designers of new **buildings** are asked to look at the existing historic **buildings** in the vicinity of the **site**, not to imitate them, but to consider whether the new **building** is sensitive to the surroundings in which it is to be placed.

ii. Replica **buildings**

- A. Replica **buildings**, in the context of these guidelines, means an exact copy of the size, proportions, and architectural details of an older **building**. While it is generally undesirable to have new **buildings** replicate the exact design of historic **buildings**, design elements of older **buildings** can be used to achieve an overall visual harmony. Replica **buildings** can devalue the authentic historic character of Akaroa.
- B. Attempts at 'replication' with inaccurate detailing, inappropriate materials and distorted proportions can become a caricature of the original **building** style.

iii. Additions and alterations to historic buildings

- A. The character of Akaroa depends to a large extent on the survival of its many historic buildings. The preservation of these surviving buildings is important in maintaining its overall character. The demolition of historic buildings has had detrimental effects on the character of the town. The retention of the remaining older buildings will generally be to the town's advantage.
- B. Listing Registration by Heritage New Zealand Pouhere Taonga, or scheduling listing by the District Council in its District Plan, are indications that particular historic buildings should be preserved and maintained for future generations.
- C. Adaptive re-use is recommended. New developments on sites occupied by older buildings should use the historic structures whenever possible by building around or adding to them in a sympathetic way.
- D. Key principles to bear in mind when adding to an historic building are:
  - I. Alterations should be the minimum necessary.
  - II. They should not detract from the heritage value of the place and/or building.
  - III. They should be compatible with the original form and fabric of the building, but should be able to be read as new work, although this need not be obvious particularly for minor additions.
  - IV. They should be of a quality that does not detract from the heritage values of the place.
- E. Ideally changes should also be reversible, to allow future generations to return the buildings to their original forms. When work is being done on historic buildings, previous inappropriate alterations should be reversed and unsympathetic additions removed whenever possible. Council's Heritage team and Heritage New Zealand Pouhere Taonga can provide advice on these matters.

F. Figure 9: Sensitive alteration to an historic building.

G. In the example to the right similar roof forms and window details have been used.

H. When work on an historic building is being undertaken the Conservation Guidelines published by Heritage New Zealand Pouhere Taonga should be consulted provide a useful reference. Where major work is envisaged, an architect who has experience in conserving or adapting older buildings should be engaged.

~~I. Both the Akaroa Civic Trust and Heritage New Zealand Pouhere Taonga are available to advise owners of historic buildings who are considering major repairs or alterations to their buildings.~~

i. Specific guidelines

i. Roof forms

A. On Akaroa's older buildings, roofs are generally of relatively steep pitch, with gable ends. Hipped roofs are evident within the Commercial Banks Peninsula Zone. More recent buildings in the town exhibit a great variety of roof forms, including hip roofs, roofs of shallow pitch, and flat, or mono-pitch, roofs. While there is a variety of existing roof forms, those which are steeply pitched (i.e. 25 degrees and steeper) maintain an attractive streetscape and achieve a pleasing relationship with adjacent and nearby buildings and are to be encouraged.

ii. Cladding, texture and roofing materials

- A. Historically, weatherboard has predominated in Akaroa. Roofs have been mostly corrugated iron with door, and window frames of wood. Brick and other forms of masonry construction are unusual in Akaroa. Consequently, the use of traditional vernacular materials, such as weatherboard cladding, and corrugated iron roofing is encouraged in Akaroa. Some recent examples have not worked well because they lack detail and texture. An example of a modern application which reflects the character of the adjoining buildings, and has been successful, can be seen on the additions to the Akaroa museum.
- B. To harmonise contemporary with traditional buildings, extensive, blank masonry walls, lacking in texture, should be avoided where masonry walls are necessary. Careful detailing and placement of wall openings, sensitive selection of colours or judicious planting can be useful in reducing adverse visual impacts to a limited degree.

iii. Windows

A. Attention should be paid to the sizes, symmetry and proportions of window openings and their placement, or grouping, in relation to neighbouring buildings. In the Commercial Banks Peninsula Zone any departure from the vertical orientation of windows of historic buildings is not encouraged. Timber windows are preferable to aluminium but if aluminium windows are used, they should be faced with timber.

B. Figure 11: Window orientation- the illustration on the right demonstrates appropriate vertical orientation and facings and has pleasing symmetry.

iv. Colours

A. There is no reason, when choosing colours for the walls, facings and roofs of new buildings, or when repainting older buildings, not to use today's much wider palette of colours than the palette available in earlier years, provided the new colours are in accordance with the historic character of the town and its streetscapes. Simple combinations of discreet individual colours are particularly preferable in areas where there are a large number of older buildings, however, the colour of new structures should not visually dominate heritage buildings or the streetscape. Owners of historic buildings are encouraged to consider using heritage colours and information about these is available from major paint manufacturers and retailers. In the Commercial Banks Peninsula Zone the preference is for painted or coloured surfaces. Corporate colour schemes and large corporate logos are not appropriate in the Akaroa Historic Heritage Area.

v. Verandas

A. The only sequence of nearly continuous shop verandas over footpaths in Akaroa is found along Beach Road. On Rue Lavaud occasional shop verandas contribute to the variety and modulation of the streetscape. Where new buildings are being erected in either of these precincts, maintenance of the sequence along Beach Road, and of the pattern of occasional verandas along Rue Lavaud, should be the goal.

B. Figure 13: Akaroa street verandas

vi. Setback and fences

- A. Akaroa's charm and historic character depend, in part, on gardens and trees remaining key elements in Akaroa's streetscapes. **Setbacks** will help ensure plantings continue to be a major element in most residential streetscapes. Only in existing commercial areas of the town, where **setbacks** are already small or non-existent, is it desirable to maintain the sense of a fully built-up townscape.
- B. Having some **buildings** hard up against the street, even in predominantly residential areas, gives the town's streetscapes attractive variety.
- C. To be able to look into and enjoy gardens along the street has long been the character of the settlement. Tall fences break this pattern, therefore low fences are encouraged. If taller fences are required, then they should be of a picket type so that the garden aspect is presented to the street.

vii. Parking and **garages**

- A. **Garages** should have a minimal visual impact on the historic character and amenity of the streetscape. They should be located further back from the road **boundary** than the main **building** and the repetitious sequences of multiple **garage** doors should be avoided. **Within the Akaroa Historic Area, garages facing the street are required to be sited behind dwellings.**

- B. Figure 14: **Garages** on street front - these **buildings** detract from the streetscape.
- C. Car parking, especially with larger developments, should be concealed behind the main **buildings**, with minimal **access** points. Where this is not practical or possible, attention should be given to screening **parking areas** from view from **adjoining** streets.

D. Figure 15: Car parking visually softened by location behind **buildings** and screen planting

viii. **Signs**

- A. Rules in the **District Plan** govern the size and placement of **signs**. Besides conforming with these rules, new **signs** will help preserve the character of Akaroa if they are simple, not excessively large and do not obscure interesting architectural details of **buildings**. **Signs** incorporating simple backgrounds, borders and text are preferable to complex graphics, particularly photomontage based **signage** and large-scale advertising hoardings. The proliferation of **signs** which are obtrusive because of their size, colour or placement, could undermine the pleasing character of Akaroa. Neon, moving, illuminated or brightly lit **signs** will generally detract from the historic character of Akaroa and are discouraged.

B. Figure 16: Signage

C. In this illustration the signs on the right detract from the form of the building and create a sense of visual clutter.

ix. Site work

A. The District Plan controls the heights of buildings in Akaroa, but again a building, which meets the requirements of the Plan, may not be satisfactory in its design, or impact on townscapes.
