LANDSCAPE TREATMENT ON ROAD BOUNDARIES

Along Teapes, Turners and Spencerville Road, a 5m wide vegetation buffer combined with a 10m building setback will ensure a 'rural-character' along the western and northern boundaries of the Plan Change area.

The landscape treatment is proposed as a 5m wide vegetation buffer and is to consist of a post and rail fence or post and wire fence with the installation of solid fencing within this strip not permitted. No private driveway access directly onto Teapes, Turners and Spencerville Road is permitted.

The planting is to consist of the following species planted at 1m centres and is to achieve a continuous minimum height of 5m once established:

- (a) *Austroderia richardii*, toetoe;
- (b) *Coprosma propinqua*, mikimiki, mingimingi;
- (c) *Cordyline australis*, tī kōuka, cabbage tree;
- (d) *Corokia cotoneaster*, korokio;
- (e) *Dodonaea viscosa*, akeake;
- (f) *Griselinia littoralis*, kapuka, broadleaf;
- (g) *Kunzea robusta*, kānuka;
- (h) *Muehlenbeckia astonii*, shrub pohuehue;
- (i) *Plagianthus regius*, lowland ribbonwood;
- (j) *Phormium tenax*, harakeke, NZ flax;
- (k) *Pittosporum tenuifolium*, kōhūhū;
- (l) *Podocarpus totara*, tōtara;
- (m) *Sophora microphylla*, SI kōwhai;
- (n) *Veronica salicifolia*, koromiko.

LEGEND

- A** Future residential buildings setback from Teapes, Turners and Spencerville Road by a minimum of 10m.
- B** Landscape treatment - 5m vegetation buffer to consist of native plant species.
- C** 1.2m Post and rail fencing along road boundaries

-  B Styx River
-  C Typical semi-rural views
-  D Built form and boundary treatments

A. AERIAL MAP (1:15,000 @ A3, SOURCE: CANTERBURY MAPS)

CHARACTER AND VIEWPOINT LOCATIONS

A Prestons wetland: This image shows views over a Prestons wetland to medium density residential development. This provides a good indication of what views over wetland plantings to residential housing may look like. Although in the context of the proposed plan change, the prospective wetland and green space area will be substantially larger in size.

B Styx River: This image shows the existing character of the Styx River as taken from Spencerville, although the character of the river is similar along the whole length of the proposal site. A dense band of Willows follows along one side of the river, and Lower Styx Road along the other.

C Typical semi-rural views: This image is representative of many of the elements in this semi-rural landscape, including post and wire farm fencing, low density built form, open paddocks and mature plantings and shelterbelts.

D Built form and boundary treatments: This image is taken from Turners Road, showing 'lifestyle block' dwellings in the area, with both the forms and finishes of buildings and boundary treatments varying in style.
