

Edgeware Village

Suburban Centres Programme

Feedback from workshops and community drop-in sessions in June 2012

This poster has a selection of main themes, ideas and goals shared by the people from this area.

A master plan is being developed for Edgeware Village shopping area with input from community leaders, building and business owners, government agencies, other stakeholders and interest groups and local residents.

Master plans provide a framework for the community on how their centre may look, feel and function. Communities can use the plan to set goals and prioritise what they want to work on or develop. This will in turn, enable the Council to make decisions based on community priorities.

For information on how you can be involved:
